This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

ADDRESS ALL COMMUNICATIONS TO THE

MEYER BROTHERS DRUGGIST

222 SOUTH BROADWAY, ST. LOUIS, MO., U. S. A.

**In the Pharmaceutical Eye.**—Charles J. Koch, Ph. G., secretary of the Retail Druggists' Association of St. Louis, is earning a reputation of much more than local importance. Mr. Koch works in an efficient as well as energetic manner. He is particularly interested in the local telephone slot machine problem, the outcome of which will influence the action of drug associations in other large cities. Mr. Koch has been active in the St. Louis association since it reorganized several years ago.

CHARLES J. KOCH

## Editorial

Index to Advertisements Page 9

**William Henry Skinner,** president of the Arkansas Association of Pharmacists and a prominent business man of Pocahontas, greets the readers of the MEYER BROTHERS DRUGGIST from the frontispiece of the February issue.

LUCIEN B. HALL

**Lucien B. Hall,** of Cleveland, O., president of the N. W. D. A., was represented on the frontispiece of the MEYER BROTHERS DRUGGIST for January, 1906.

**The Pure Food Bill is Creating Much More Discussion** and developing a harder fight in congress than has been the case with any of its predecessors. The point has been reached where each side must line up its forces and fight over the ground inch by inch. It is generally understood that the bill is supported by those who are determined to protect life and health, while those who are opposed to the bill disregard the public's good on account of their own individual interests which would be adversely affected by the passage of a pure food law. This is not the true condition of affairs, at least as far as the opposition is concerned. Among those who oppose the measure is a class of per-

Digitized by Google

sons who firmly believe that the best interests of health and as a consequence happiness will be jeopardized by the very regulation which is intended to protect the public health.

While opposition to the pure food legislation continues strong, it is not developing as rapidly as the sentiment in favor of such legislation. The present bill cannot be quietly disposed of in committee as has been its predecessors. There is a general awakening throughout this country to the possibilty of better protecting those who are not capable of judging for themselves in health matters. The various hospitals for the treatment of tuberculosis, the improved conditions in city hospitals and city dispensaries for the care of patients with contagious diseases, the anti-spitting ordinance, the work of the Department of Agriculture at Washington in examining various medicines and publishing information about those which are fraudulent, the crusade against certain patent medicines, the work of the Council on Chemistry and Pharmacy of the A. M. A., the activity of the post-office department in debarring the privilege of the mails to certain fraudulent medicine manufacturers are straws which show the direction in which public opinion is moving. It behooves the conservative element to watch the progress and see that the over-zealous do not defeat their own object by too great haste and the enactment of unjust laws.

**How Many of Your Friends Are Dying With Consumption?**—The number is great. This disease has a far greater hold upon human beings than should be the case. While it is true that medical science has failed to find a specific cure for consumption, it is also true that certain simple rules and regulations will greatly reduce the ravages made by the tubercle bacilli.

The present health commissioner of St. Louis, Dr. C. A. Snodgrass, is co-operating with the Association for the Prevention of Tuberculosis and the St. Louis Civic Improvement League with a view of reducing the percentage of cases of tuberculosis in the city. Sanitary inspectors have been appointed to gather statistics, locate cases of tuberculosis and enforce simple hygienic rules of cleanliness, with a view of retarding the spread of the disease. The anti-spitting ordinance will be more vigorously enforced. The employes of the street car lines and the city police will co-operate in this direction. The present custom of treating consumptive patients at the city dispensary in a promiscuous manner will be stopped. Such patients will be given attention at the Emergency Hospital, and probably at certain hours of the day. The city will be asked to appropriate a sufficient sum to erect in the suburbs a special hospital for the care and treatment of consumptives.

Pharmacists are looked upon as purveyors of information of a universal character. They are in a position to do much towards educating the public up to the present standard of hygiene relative to tuberculosis. What is taking place in St. Louis is also transpiring in other large cities, and we urge the readers of the MEYER BROTHERS DRUGGIST to take more interest in this important branch of the science and art of caring for the human health.

**A Legal Pharmaceutical Library** in New York State must contain the Eighth Decennial Revision of the United States Pharmacopœia or one of the commentaries, such as a dispensatory based upon this revision of the Pharmacopœia. This requirement is not a part of the organic law of the State, but is a new rule adopted by the board of pharmacy, which, we are assured, has full authority to make such regulations. In some of the countries where the Pharmacopœia is issued by the government, the law requires each drug store to have an official copy of the latest edition of the standard, Thus, the action of the New York Board is not entirely without precedent, but, as far as we know, it is the first board in the United States to adopt such a regulation. We surmise that other states will follow this example, and we suggest as a suitable question for board examinations:

"Compare the United States Pharmacopœia with two of the commentaries on the Pharmacopœia."

This will test the applicant's actual knowledge of the Pharmacopœia as an individual work, and will also show whether he understands the scope of such commentaries as the United States and National Standard Dispensatories, Remington's Practice of Pharmacy, Caspari's Treatise on Pharmacy, Coblentz's Handbook of Pharmacy and other similar commentaries. Some of these commentaries contain practically all of the text of the Pharmacopœia, while others reprint but very little of the Pharmacopœial matter.

**Arsenic is High,** and the price is likely to go still higher during the present year. The poison now commands about twice the price of twelve months ago. The demand for arsenic in the manufacture of glass has steadily increased year by year. Another important source of consumption is the factories producing Paris green. The medicinal use of arsenic is not sufficient to seriously affect the market. It is estimated that two years ago the world's production of arsenic was nine thousand tons. Arsenic is found pretty much the world over and has been mined in Wales, France, Germany, Portugal, Canada, the United States and some other countries. In addition to the increased demand, we find a second very important factor governing the price of arsenic. The mines in Wales and also some of those in Europe have reached a depth where flooding by water has rendered it impractical to continue mining operations even at the present price of arsenic. The United States mines are located in Montana, Arizona and Washington. They have thus far played an unimportant part in the production of arsenic but we look for the high price of the chemical to stimulate increased operations in the mines of this country.

---

**The N. A. R. D.** general secretary is Thomas V. Wooten, Chicago, Ill.

Digitized by Google

# STRAY ITEMS AND COMMENTS.

**Formaldehyde** is manufactured in large quantity at Marquette, Mich.

**Insect Powder** is not in season just at present, but the thoughtful pharmacist will order his stock for future delivery.

**The N. W. D. A.** has selected Washington as the place of the October 8, 1906, meeting, a happy selection of an interesting city at an interesting time.

**Don't Abuse the Jobber.** — Thinking retailers should not expect loyal jobbers to ship them D. C. S. N. goods if their names are not on the proprietors' lists of accredited retail agents.—[*N. A. R. D. Notes.*

**The Index** to the volume of the MEYER BROTHERS DRUGGIST for 1905 appeared in the January, 1906, issue. It can be easily removed for binding with the completed volume which makes a very useful work of reference.

**Vanilla Beans** are now cheap, and unusually fine goods can be obtained. It is worth your while to secure the beans and not use some of the substitutes for vanilla. In some states such substitutes are prohibited by law.

**Drug Clerks on the Boards of Pharmacy.**—Illinois and California have boards on which the drug clerks of the states are represented by one of their number. If the list of such states is greater than above mentioned, we will be pleased to learn the facts in the case.

**Goods That Freeze** should be borne in mind by the retail druggist when placing orders at this season of the year. We published a very complete list of freezable goods on page 31 of the MEYER BROTHERS DRUGGIST for September, and on page 114 of the journal for October.

**Are Druggists Easy Money?**—Fake jewelry firms seem to think that such is the case and many experiences point in a similar direction. Retail druggists should use the same good judgment in purchasing jewelry from only reputable firms that they exercise in buying medicines.

**The Activity of the Missouri Board of Pharmacy** has made itself felt and many pharmacists have secured registered clerks who were previously violating the law by running the store without legally competent help. We hope all will comply with the law, so that the board will find it unnecessary to push prosecutions.

**Bacteriology,** modern physiology, microscopy and various other new branches of medicine makes life a burden for the medical students of today. With his four or five years course of study, each year containing from seven to nine months, he finds himself crowded in his efforts to successfully cover the course of instruction. No wonder that he longs for the good old days when medicine was taught in one or two terms of twenty weeks each.

**The Artificial Creation of Life** is what Dr. Charles Littlefield announced some time ago. His explanations were so plausible and his methods so simple that the newspapers took the matter up in a popular way and gave Dr. Littlefield much publicity. The *Scientific American* for September 30, contains an article reviewing in detail the work of Dr. Littlefield and showing that his methods are faulty and that we must still continue to rest upon the assertion of Professor Tyndall when he said: "I affirm that no shred of trustworthy evidence exists to prove that life in our day has ever appeared independent of an antecedent life.

**The Medical Profession of the United States** was quick to recognize the superior training of the physicians in the Japanese army during the late war. The medical journals of America were loud in their praise of the scientific work of the Japanese physicians. It is gratifying to find the president of the United States also in touch with the situation. On a recent public occasion, President Roosevelt announced that his best efforts would be used in securing conditions which will enable the physicians in the United States Army, Navy and American Hospital Service to become better qualified during times of peace for service in times of war.

**The Pharmacy Law of Illinois** is carefully reviewed by the board of pharmacy in a communication published elsewhere in the February issue of the MEYER BROTHERS DRUGGIST. Every pharmacist, assistant pharmacist and apprentice of the State should carefully read this exposition of the law, which points out those features which every one connected with pharmacy in that state should keep constantly in mind.

This action on the part of the Illinois board is quite similar in purpose to the communication of the Missouri Board of Pharmacy, which we published on page 28 of the MEYER BROTHERS DRUGGIST for January. If any of our Missouri readers have failed to study the Missouri communication, they should hasten to become familiar with that document.

**Bachelor of Science in Pharmacy.**—The University of Glasgow, Scotland, has decided to institute a degree of science in pharmacy, represented by the title "B. Sc. Pharm." This will be granted only after a thorough scientific course along pharmaceutical lines. It is quite different from the degree of bachelor of pharmacy (Ph. B.) granted by three or four colleges in the United States. A bachelor of pharmacy takes the regular two-year course of instructions, the degree in some colleges being distinguished from that of graduate in pharmacy (Ph. G.) by being issued to those who do not have practical drug store experience, "Ph. G." being reserved for students who in addition to the regular college work have had four years' experience in a store where prescriptions are compounded.

# FROM A DRUG CLERK'S DIARY.

## A Week's Experience in a Retail Drug Store in a Country Place.

BY HARRY N. FORCE, PH. G.

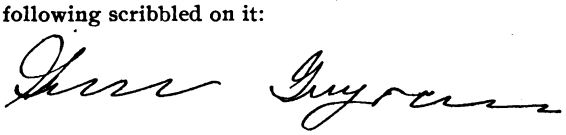
[Continued from page 366.]

Another odd superstition he spoke of savored of the old Salem witchcraft days. "I remember hearing it said when I was a small boy that if you stuck a nail in your foot you wanted to get the nail and stick it in a piece of tallow just as far as it had stuck in your foot and the sore on your foot would heal up right away."

I was filling a prescription intended for a child with the thrush when the following interesting conversation was heard on the other side of the prescription case, between the father of the child and an old farmer: "If that 'ar medicine don't cure the thrash I've got a grandson what never seen his daddy. He can shore cure hit." "How does he do it?" "He jest blows in hits mouth an' hit jest naterally gits well. An' I'll tell you another way. Jest let the kid drink some water outen a shoe that belongs to some one what ain't no kin to the kid and I'll bet my yaller dorg gin a coon skin that you don't have to give hit ary nother dose of medicine." And I smiled to myself as a vision flitted across my mind of the "Oriental Thrush Cure Co." busily engaged in pouring water into old shoes and out into bottles. What a chance for a profit-making investment!

**A New Kind of a Chest.**—The old lady to whom I was selling a plaster evidently had never heard the term "chest" applied to a portion of the human anatomy. It was plainly to be seen that she was superstitious also or she would not have believed that the application of a plaster to a box could have done her "ole man" any good. I was explaining how to use the plaster she was buying. "Apply it to his chest," said I "and I believe it will relieve him." "He ain't got ary chist but he's got a mighty nice box under the bed. Don't you reckon that would do?" I "reckoned" not and carefully explained just how I meant the plaster should be applied.

**Medical Colleges Should Teach Penmanship.**—It is a great mystery to me why physicians do not cultivate at least ordinary legibility in their writing. A customer handed me a slip of paper today with the following scribbled on it:



I gave one despairing glance at it and then asked the customer if he had heard the doctor say what it was. "Yes," he said "it is gum guaiac. Dr. Brown told me to get some of it but I told him to write it down so I would not forget it." And so he obtained his resin guaiac, thanks to his memory and not to the doctor's ability to write and spell.

I believe medical colleges should teach penmanship and not turn their graduates loose upon we suffering pharmacists until they can at least write the names of the ordinary remedies so that they can be read without our having to guess at them. There should be no guess work in filling prescriptions. The foregoing is a fair sample of the way this Dr. Brown writes his prescriptions all the time. A neatly written prescription is a thing of beauty and a joy forever to the weary druggist.

**More Medical Superstitions.**—I have struck a rich mine of information as regards superstitions in the personage of Aunt Talitha Gilley. Poor old Aunt Talitha. Homeless, friendless, a pauper and worst of all a morphine fiend, she is an object of pity indeed. What a hit she would make on the stage in personating an old-time witch! The picture is complete in all the little details. The ghastly, deathlike features with bleared eyes and blackened snags of teeth; the bony fingers holding the old black clay pipe and the rough stick with which she steadies her tottering steps; the regulation red handkerchief tied over her head, surmounted by an old sunbonnet; the faded gray shawl over the faded calico dress from beneath which show the coarse and well-worn shoes—not an item is missing in the make-up. I pity the forlorn old soul too much to make sport of her and she seems very grateful to me for my words of sympathy. The one subject upon which she is accurately and extensively informed is the very one in which I am intensely interested—superstitions. It is not difficult to get her started to talking along this line.

"Cure Warts? Law, Child, I Reckon I Can.—There's lots of ways to cure warts. One of the surest is to go to a house where there is an orchard and steal a knife out of the house—any kind of a knife will do—case knife or any. Go to an apple tree or peach tree, any fruit tree will do though, and cut as many notches on the tree as you have warts. Then go away and the warts will leave you before many days. Be sure and not look back at the tree when you start off for if you do it will not work." "Do you have to keep the knife or can you take it back to the house?" I asked. "Don't make ary bit of difference. Take it back if you want to and the warts will go away jest the same. I know it will sure take 'em off for I've tried it." I patiently waited while she filled the old black stone pipe with tobacco crums which she fished from a pocket somewhere in the faded old calico dress. "Gimme a match." I brought her the box and she took as many as the bony fingers could grasp and stowed them away in the depths of the pocket with the remainder of the tobacco. She always helps herself to matches in this generous fashion. "Another good way," she continued, "is to take three grains of corn, go to where the road forks into three roads. Put a grain of corn in each road and put a little rock over it. The warts will leave you and go to the first person knockin' one of the rocks off."

[*To be Continued.*]

# WORKING FORMULAS.

BY ALBERT E. EBERT, PH. M., PH. D., CHICAGO.

Correspondence solicited. Numbered items are answers to questions. Also see Quiz and Prescription Case Departments.

**A Quick Drying Lotion Wanted** (2), something which we can place on the market as a face lotion.

| | | |
|---|---|---|
| 1. | Glycerin | 8 fl. ozs. |
| | Alcohol | 8 fl. ozs. |
| | Rosewater | 10 fl. ozs. |

Mix: This may be tinted with a solution of cochineal or other vegetable coloring matter, orange flower water can be substituted for the rosewater, if desired.

| | | |
|---|---|---|
| 2. | Tragacanth, whole | 60 grains. |
| | Water | 13 fl. ozs. |
| | Glycerin | 2 fl. ozs. |
| | Alcohol | 1 fl. oz. |
| | Borax | 60 grains. |

Macerate the tragacanth in the water until perfectly soft, strain by expression through muslin, dissolve the borax in the glycerin by aid of heat, add to the mucilage, perfume to suit, and add, if necessary, enough water to make 16 fluidounces.

| | | |
|---|---|---|
| 3. | Tragacanth, whole | 120 grains. |
| | Water | 12 fl. ozs. |
| | Glycerin | 4 fl. ozs. |
| | Tincture benzoin | 2 fl. drs. |
| | Borax | 60 grains. |

Macerate the tragacanth in the water until soft, and dissolve the borax in the glycerin. Mix the two solutions, add the benzoin and strain with expression through muslin, perfume with some extract and tint to suit.

| | | |
|---|---|---|
| 4. | Tragacanth, powder | 60 grains. |
| | Borax | 60 grains. |
| | Ammonium chloride | 120 grains. |
| | Glycerin | 8 fl. ozs. |
| | Water | 13 fl. ozs. |

Triturate the gum with glycerin to a smooth paste, dissolve the borax and ammonium chloride in a portion of the water, filter this solution, mix the two liquids, add the remainder of the water and incorporate some extract to perfume by agitation.

## Sachet Powders.

### Jockey Club.

| | | |
|---|---|---|
| 1. | Orris root | 8 av. ozs. |
| | Red rose petals | 6 av. ozs. |
| | Lavender flowers | 2 av. ozs. |
| | Vanilla | 120 grs. |
| | Musk, grain | 16 grs. |
| | Essence of jasmine | 1 fl. oz, |
| | Oil of sandalwood | 80 drops. |
| | Oil of neroli | 20 drops. |
| | Oil of rose | 40 drops. |

Reduce the first three ingredients to powder by grinding in a mill, contuse the vanilla with a portion of the ground mixture to powder; also triturate the musk with a portion of the powder intimately, add the oils and essence and mix the whole thoroughly by trituration in a mortar.

| | | |
|---|---|---|
| 2. | Orris root, powder | 12 av. ozs. |
| | Sandalwood, ground | 2 av. ozs. |
| | Oil of bergamot | 2 fl. drs. |
| | Oil of rose | 8 drops. |
| | Tincture of musk | 4 fl. drs. |
| | Tincture of civet | 2 fl. drs. |

Mix the orris and sandal, add the other ingredient and triturate until well mixed.

### New Mown Hay.

| | | |
|---|---|---|
| 1. | Orris root | 4 av. ozs. |
| | Red rose petals | 4 av. ozs. |
| | Orange flowers | 2 av. ozs. |
| | Musk seed | 2 av. ozs. |
| | Tonka | 2 av. ozs. |
| | Benzoin | ½ av. oz. |
| | Oil of bitter almonds | 5 drops. |
| | Oil of bergamot | 15 drops. |

Grind the orris, rose petals, orange flowers and musk seed together in a mill to a powder, triturate the tonka with a portion of this to a fine powder, also reduce the benzoin to a powder, mix all and add the oil and mix intimately.

| | | |
|---|---|---|
| 2. | Orris root | 13 av. ozs. |
| | Tonka | 1½ av. ozs. |
| | Vanilla | 1½ av. ozs. |
| | Oil of bitter almonds | 2 drops. |
| | Oil of rose geranium | 24 drops. |
| | Oil of rose | 6 drops. |
| | Oil of bergamot | 12 drops. |
| | Tincture of musk | 2½ fl. drs. |

Prepare like the preceding.

### Patchouly.

| | | |
|---|---|---|
| 1. | Patchouly leaves | 8 av. ozs. |
| | Lavender flowers | 3 av. ozs. |
| | Orris root | 2 av. ozs. |
| | Clove buds | 1 av. oz. |
| | Oil of bergamot | 1 fl. dr. |
| | Oil of patchouly | 5 drops. |
| | Tincture of musk | 30 drops. |

Mix the first four ingredients, grind to powder in a mill, add the other ingredients and mix well.

| | | |
|---|---|---|
| 2. | Patchouly leaves | 12 av. ozs. |
| | Orris root | 3 av. ozs. |
| | Oil of patchouly | 15 drops. |
| | Oil of rose geranium | 10 drops. |

Prepare like the preceding.

### Rose.

| | | |
|---|---|---|
| 1. | Red rose petals | 16 av. ozs. |
| | Oil of rose geranium | 30 drops. |
| | Oil of rose | 30 drops. |
| | Tincture of musk | 30 drops. |

Grind the rose petals to moderately fine powder, add the other ingredients and mix thoroughly.

| | | |
|---|---|---|
| 2. | Red rose petals | 8 av. ozs. |
| | Orris root | 8 av. ozs. |
| | Sandalwood | 1½ av. ozs. |
| | Patchouly leaves | 1 av. oz. |
| | Tincture of civet | ½ fl. dr. |
| | Oil of rose geranium | 15 drops. |
| | Oil of rose | 10 drops. |

Mix the rose petals, orris root, sandalwood and patchouly leaves, grind to moderately fine powder in a mill, add the other ingredients and mix well.

### Verbena.

| | | |
|---|---|---|
| | Orris root, powder | 16 av. ozs. |
| | Oil of bergamot | 1 fl. dr. |
| | Oil of verbena or lemon grass | 1 fl. dr. |
| | Oil of rose geranium | 15 drops. |
| | Tincture of musk | 1 fl. dr. |

Mix the whole thoroughly.

### Violet.

| | | |
|---|---|---|
| | Orris root, powder | 16 av. ozs. |
| | Oil of bergamot | 15 drops. |
| | Oil of bitter almonds | 7 drops. |
| | Oil of rose | 5 drops. |
| | Tincture of musk | 3 fl. drs. |

Mix the whole thoroughly.

# QUIZ DEPARTMENT.

**Read This Before You Ask a Question.**

Many questions are thrown in the waste basket each month on account of the correspondents failing to give name and address. The editor has a large basket for such questions. Write questions on separate sheets and on but one side of the paper. No questions will be answered by mail. Spell out in full every word; never abbreviate the names of medicines.

**Black Flux** (14) is made by burning cream of tartar with half its weight of potassium tartrate.

**Pharmaceutical Interrogations** (15), by Beal, is published by the Midland Publishing Co., Columbus, O.

**The Missouri Secretary** (16) of the board of pharmacy is Paul L. Hess, Independence and Forest Avenues, Kansas City, Mo.

**Must be Examined in Missouri** (17).—The fact that you are a registered pharmacist in Iowa does not in any way entitle you to register in Missouri without an examination. The law of the state fails to make a provision for the recognition of certificates from boards.

**Butyric Acid** (18).—I should like to get some information upon butyric acid. Where, and about how much is made in this country? About how much is consumed, and what are the lowest market prices in large lots of the different grades? And any other information with respect to the acid will be gratefully received.

Who can answer?

**Medicated Tamarinds** (19).—

| | |
|---|---|
| Tamarind pulp | 5 av. ozs. |
| Sugar, powdered | 5 av. ozs. |
| Senna, powdered | 1¼ av. ozs. |
| Cream of tartar | 2 drs. |
| Manna | 8 av. ozs. |
| Water, hot | 16 fl. ozs. |

Dissolve the manna in the water, strain, add the other ingredients. Mix and evaporate by means of water bath in porcelain or enameled iron dish to proper consistency.

**Hospital for a Paralytic** (20).—I desire to place in a hospital a man past sixty years of age who is paralyzed and who can afford to pay $4.00 or $5.00 per week for hospital accommodations.

Answer.—We suggest that you address the Bethesda Hospital for the Incurable, St. Louis. It is possible that you may be able to find accommodations in the St. Mary's Infirmary, St. Louis. Just such a hospital as you have in mind is difficult to locate, even in this large city.

**Mucilage Acaciæ, U. S. P.** (21).—I wish to call your attention to mucilage acaciæ of the new U. S. P. which requires 330 gm. lime water. This must be a mistake. Official copy, C 2430.

What Chairman J. P. Remington, of the revision committee says:

"The use of lime water in the formula for mucilage of acacia is not a mistake. It has been found by experiment that such a mucilage keeps much better than one made with plain water. In addition to this, the acidity often found in some samples of acacia is neutralized."

**Required to Take Out But One License at a Time** (22).—A reader of the MEYER BROTHERS DRUGGIST complains that no one has explained, not even the internal revenue commissioner, whether it is necessary to take out a special $25.00 license for the sale of certain alcoholic medicines in case the druggist now pays the regular $25.00 internal revenue fee.

Answer.—This explanation has not been made because it did not occur to any one that such a question would be asked. The $25.00 entitles the party paying it to sell any and every kind of alcoholic liquid. One such license is all that is required.

**States With Pre-Requisite Laws** (23).—As far as we know, New York State and Pennsylvania are the only ones with such legislative enactments. The Pennsylvania law is more recent than the former, and in some respects more easily enforced. The latter had the benefit of the experience of the New York enactment. In Pennsylvania the board at once recognizes as colleges in good standing, the twenty-six which now belong to the American Conference of Pharmaceutical Faculties. Ohio, Illinois and some other states have broad rulings which in a way answer the same purpose as a pre-requisite law.

**An Oxygen Liberating Tooth Powder** (24).—We have ran up against it, we want two formulas, one for a urethral bougie and one for a tooth powder; we wish to use in both either calcium, zinc or strontium peroxide, also in the tooth powder sodium perborate. Our object is to liberate oxygen when same comes in contact with gums of the mouth or gonococci. We can not find any data as to incompatibility of these drugs.

Answer.—We are unable to help you out in your emergency. The problem is too deep for us. Perhaps some of our readers have suggestions to make, but we fear that you are really, as you say, "up against it."

**No Place for Him to Locate** (25).—A subscriber to the MEYER BROTHERS DRUGGIST informs us that a friend has attended one year in a medical college and desires to practice medicine until he earns sufficient to complete his medical studies. He is anxious to know where he can locate and practice medicine without violating a law.

We are unable to find him a location and suggest he look for other means of earning the money necessary in completing his medical studies. It has reached that point where it is difficult to find a location where either medicine or pharmacy can be practised by the incompetent without running the risk of prosecution.

**Blue Ointment Not Mercurial Ointment** (26).—Your clerk is right, as you will find by referring to the Eighth Revision of the U. S. P. This authority now distinguishes between mercurial ointment, which is officially known as unguentum hydrargyri, and blue

Digitized by Google

ointment, which is officially known as unguentum hydrargyri dilutum. Mercurial ointment contains fifty per cent of mercury, as did the unguentum hydrargyri of the U. S. P. of 1890. The blue ointment contains one-third metallic mercury and conforms to the corresponding ointment of a number of different foreign Pharmacopoeias. This is what is generally wanted under the label of blue ointment, and we presume it is what your customers will usually want when they ask for mercurial ointment.

**Pharmaceutical Arithmetic** (27).—There are more works than one on this subject, so we do not know to which one you refer. We find the following in the editor's library and will be glad to learn of still additional works on the same subject:

"Arithmetic of Pharmacy."—A. B. Stevens, Ph. D., Ph. C. 1905. Merck & Co., N. Y.

"Chemical Arithmetic with Twelve Hundred Examples."—Sydney Lupton, M. A., F. C. S., F. I. C. Second edition, 1886. Published by McMillan & Co., N. Y.

"Notes on Equation Writing, Chemical and Pharmaceutical Arithmetic."—J. H. Beal, Sc. D., Ph. D. Third edition. The Midland Publishing Co., Columbus, O.

"Course in Pharmaceutical Arithmetic, including Weights and Measures."—Julius William Sturmer, Ph. G. Second edition with answers, 1904. Published by the author.

"Pharmaceutical and Chemical Problems and Exercises in Metrology, Percentage and Proportion, Fortification, Dilution, Specific Weight, Thermometry, Chemical Formulas and Equations, including Nine Hundred Chemical Reactions together with Rules and Explanations."—Oscar Oldberg, 1892, second edition, Published by The Apothecaries Co., Chicago.

**Internal Revenue and Patent Medicines** (28).—We suppose you are familiar with the later internal revenue rulings, and would be pleased to have your opinion on:

1. How same will effect the manufacture of medicines with alcohol.

2. If the payment of the manufacturer's taxes will have an end to it, or will there be a state or county tax, or any danger of any other tax?

3. Will the manufacturer be allowed to make bitters until notified that such name of goods can no longer be made without revenue or special tax?

Answer.—1. We believe the new ruling will decrease the sale of medicines containing alcohol and sold almost exclusively as beverages. We believe some of the manufacturers of such beverages are already looking around for a change in their plans.

2. States, counties and small towns or villages are all very likely to follow the lead of the government and enforce the payment of liquor licenses where goods are sold which the government has declared to be intoxicating. In fact, some local option towns have long followed a similar plan.

3. If you will read the notice which, no doubt, was sent you by the internal revenue collector, you will find that publicity will be given to goods placed upon the special list. On page 5, of the January issue of the MEYER BROTHERS DRUGGIST, and also in the news columns of our February issue, we give the list as announced by the commissioner.

# SHORT INTERVALS.

BY ROBERT BRUCE, CLINTON, N. Y.

The Drone is usually a self-thought specialist out of a job.

Some Men are Chronic Kickers, and some are too lazy to kick.

Some People spend the most of their lives looking behind them.

Not a Few Who Think they are sharp, get well trimmed by the sharpers.

He Who Follows only beaten paths makes no important discoveries.

A Good Man and a Good Business man are not necessarily synonymous.

Whatever You Do, get into the habit of assuming the responsibility for the result.

Nothing Is More Exasperating than the memory of a mistake that was all our own fault.

The First Business Lie is about the poorest initial investment that any man or firm can make.

The Importance of a Thing is to be measured by its power for business, rather than by its bulk.

This Would be a Jolly Old World if we could merely press a button and pull out an idea or a result.

The Older We Get, the more difficult we are to please, and the less trouble people will take to please us.

It is a Good Thing to know enough about law to keep out of its clutches—to say nothing of the lawyers.

The Fellow Who is Always Waiting for something to turn up, seldom turns up when there is anything to be done.

The Names that Look the Best on door-plates and office windows don't always carry the most weight on checks.

Advertising Won't Grow Hair on a bald head, but it has sold many a medical preparation that wouldn't do it either.

First Impressions are often misleading; some of the worst-smelling phosphate the writer ever used gave the best returns.

The Pharmacist Who Allows old stuff to accumulate is cheating the bonfire and the junk man out of their rightful property.

It Sometimes Becomes Necessary for an employe to absent himself from the store or office in order that the employer may learn his true value. But don't presume upon it too often.

The Narrow Individual who drops a nickel in the slot only when there is the positive certainty that six cents will come out, never gets very far ahead in business, or makes progress worth noting.

The Pharmacist Who Goes About his store looking for something to find fault with gets the help "by the ears," and they soon become rattled. Trust your employes, and when you find they are not doing efficient and faithful work, discharge them.

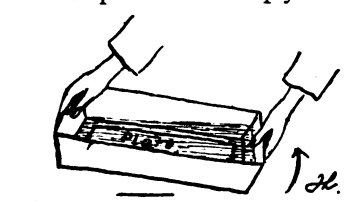
# NOTES ON PHOTOGRAPHY.

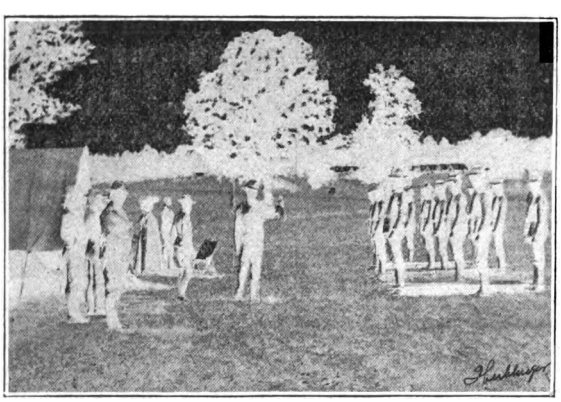
BY JULIUS LEIBLINGER, SERGEANT, FIRST CLASS, HOSPITAL CORPS, UNITED STATES ARMY, WASHINGTON BARRACKS, D. C.

[Continued from page 373.]

The strength of the developer should comply with the character of the plate. A normal exposure requires a full strength developer. A few drops of 10% pot. bromide solution, when added to overexposures will check the action of the developer and improve the negative. An underexposure plate can be saved by transferring it, without previous washing, into a tray of pure water, soaking it for a while and again placing it into fresh developer. Fresh developing solution should be used at all times. The temperature of the solution should range from 65° to 70° Fahrenheit. A warm developer acts rapidly and is apt to produce flat and foggy negatives. A cold developer acts slowly and gives weak negatives.



Position of Tray During Development.



A Negative.

How to Fix.—A combined hardening and clearing and fixing bath is far superior to the plain hypo. bath, possesses better keeping qualities, can be used repeatedly and remains clear for a long time. It should be kept at an acid reaction, and occasionally improved by the addition of a small amount of an acid. A precipitate, whenever it appears, should be removed by filtration through cotton.

The negative after developing is soaked in water for about two minutes and then placed into the fixing bath and there retained until all traces of the yellowish bromide of silver disappears from the back of the plate. To assure entire fixing it is necessary to keep the plate several minutes longer in the bath after clearing.

Development with pyro, hydrochinone and eikonogen will often produce yellow negatives. This stain is removed by soaking the plate in the following solution after fixing:

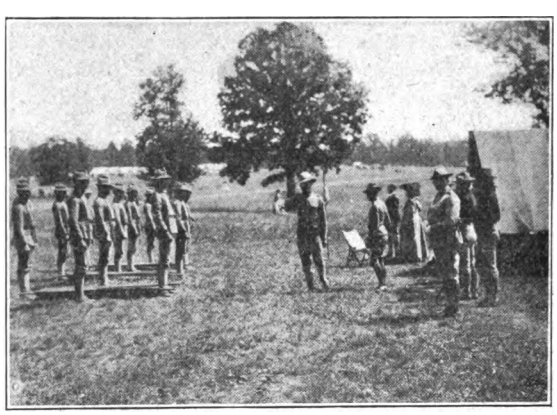
| | |
|---|---|
| Sulphate of iron | 3 ounces. |
| Sulphuric acid | 1 ounce. |
| Alum | 1 ounce. |
| Water | 20 ounces. |

Mix.

The excess of hypo solution can be removed by placing the plate into a hypo eliminator. The following solutions are suggested:

1. Hydrogen peroxide ..... 1 ounce.
   Water ..... 5 ounces.
2. Barnim dioxide ..... 1 ounce.
   Glacial acetic acid ..... 1 ounce.
   Water ..... 4 ounces.
3. A saturated solution of alum.

Washing.—The foremost and best hypo eliminator is water, and a thorough washing is essential for the preservation of the negative. That can be well performed by washing the plate in running water for one hour or in 12 to 16 changes of water whenever the former is not available. Imperfect washing will cause white and yellow stains on the gelatine, and finally will result in total destruction of the negative.



A Print From Above Negative.

[*To be Continued.*]

**A Poetic Suicide.**—A drug clerk in England took prussic acid, but before doing so, wrote the following lines:

A drop of Arsenic very soon
My fleetest steps would settle;
A drop of prussic acid, too,
Has put me off my mettle.
27th May, 1905, I departed this life.

# REPORT ON NEW REMEDIES.

TO THE MEMBERS OF THE NEW YORK STATE PHARMACEUTICAL ASSOCIATION: Your committee herewith submits a list of the new remedies introduced since June, 1904.—[THOMAS J. KEENAN chairman.

(Continued from page 11.)

Eusoma, a word compounded of the Greek prefix *eu*, meaning well, good, etc., and the suffix *soma*, meaning the body, is applied by the Eusoma Pharmaceutical Co., Cincinnati, Ohio, to a liquid compound of *Echinacea angustifolia*, *Thuja occidentalis* and *Baptisia tinctoria*, which has been used successfully as an antiseptic dressing in the treatment of wounds and skin diseases.

Elchina is a fortified cinchona elixir containing 0.32 per cent quinine, 2 per cent sodium glycerophosphate and 1 per cent tincture of nux vomica. Mixed with wine and in some cases with the addition of 3 per cent of hydrochloric acid, it is considered useful in gastric affections and weakened conditions.

Emollientine is an ointment made by Parke, Davis & Co., which contains alum, carbolic acid, isarol, lead oxide, corrosive sublimate and zinc sulphocarbolate, which is recommended in the treatment of burns, scalds and lacerations.

Emulgates are dry, light and rather pleasant tasting powders, which may be administered pure or mixed with sugar in capsule or tablet form. The powders are prepared by a special process from equal parts of oils and lecithalbumin. A number of these so-called emulgates have been put on the market under the names of castor oil emulgate, codliver oil emulgate, iodipin emulgate, bromipin emulgate, creosotal emulgate, sandal oil emulgate, copaiba emulgate, male-fern emulgate, etc.

Emulgen is an emulsifying agent of recent introduction which is said to form good emulsions with oil in the proportion of one part of emulgen to five parts of oil. The substance is said to consist of tragacanth, 10 parts; acacia, 5 parts; gluten, 5 parts; glycerin, 20 parts; alcohol, 10 parts; water, 50 parts.

Enesol is a mercury salicylarsenite, obtained by the action of methylarsinic acid on basic mercuric salicylate. It is a white amorphous powder, soluble in water to the extent of 1 in 25. It is said to form a less irritating and less toxic substance than its constituents separately.

Enterin is the name under which a hexamethylentetramine proteid has been introduced. It is used as an antipyretic and astringent in doses of 0.75 Gm.

Epinephrin Hydrate is the chemical designation of adrin, the active principle of the suprarenal gland, as made and marketed by the H. K. Mulford Co., Philadelphia.

Epinephrin is the name adopted by Sharp & Dohme, Baltimore, for the active pressor principle of the suprarenal gland, prepared in accordance with the method of the discoverer, Professor J. J. Abel.

Erosan is one of the new guaiacol elixirs put up by Swiss firm. It is said to consist of potassium sulpho guaiacolate, Gm. 10; water, Gm. 30; syrup, Gm. 105 fluidextract of orange peel, Gm. 5, and ethyl mor phine hydrochloride (dionine), Gm. 0.3. This ma be identical with Erasin, previously reported, as it is a common occurrence for names to become altered i the printing.

Ether Salicylate has been introduced as a substitute for mesotan. Mixed with an equal volume of castor and olive oils, it is used in this way as an external application in the treatment of rheumatism.

Eucaine Lactate appears in form of a white powder, with a melting point of 155° C. It is easily soluble in water, forming a solution of faint alkaline reaction; 119 Gm. of eucaine lactate contains the same amount of eucaine base as 100 Gm. of eucaine hydrochloride. It is very effective as a local anæsthetic, and is preferred in eye, ear, nose and throat operations, being prepared in solutions of different strengths, according to the site of operation.

Eudrenine is a local anæsthetic liquid intended for tooth extraction by injecting into the gum ten minutes before operating the contents of one or two capsules (8 to 17 minims), according to the number of teeth to be extracted. Each cubic centimeter of the liquid contains $\frac{1}{3}$ grain of beta-eucaine hydrochloride and $\frac{1}{2000}$ grain of adrenalin chloride. Made and marketed by Parke, Davis & Co., Detroit.

Eutannin is a substance of a composition unknown to us, which is recommended as an intestinal astringent. It is said to be taken readily by infants and to be useful in acute and chronic diarrhœas. Made by Vogtenberger & Foehr, Feuerbach, Germany,

Eserine Oil consists of a solution of eserine salicylate in olive oil, which affords a painless method of applying eserine to the eye. The solution, when made according to directions, is sterile and keeps indefinitely. Its action upon the eye is asserted to be prompt and painless.

[*To be Continued.*]

**Examining Caoutchouc by the Aid of the Microscope.** *Comptes Rendus*, cxl., (1905) pp. 1142-3.—P. Breuil examines caoutchouc by reflected and by transmitted light, by the aid of a microscope which is also fitted up for photographing the preparations. Thin films are obtained by evaporating solutions of caoutchouc in divers solvents. Delicate transparent strips may also be used. For examining with reflected light, an arc light of twenty amperes is necessary, and the specimens used are prepared after the manner used in metallography, *i. e.*, the pieces are shaped, polished and etched with sulphuric and nitric acids. Microscopical inspection enables the observer to detect the nature and purity of the rubber, as well as the presence of impurities and adjuvants.

**The Cough Syrup** tasted pleasant and an Ohio child helped itself to what remained in the bottle after being given a dose. Death ensued.

# ARMY HOSPITAL CORPS.

BY JULIUS LEIBLINGER, SERGEANT, FIRST CLASS, HOSPITAL CORPS UNITED STATES ARMY, WASHINGTON BARRACKS, D. C.

Correspondence for this department is solicited.

**Nursing and Ward Management.**—1. What do you understand by the three vital signs? How does the rise of temperature affect the pulse and respiration?

2. How many ways can you take temperature? Which is the most accurate way? How do you take the pulse? A patient has delirium tremens, where do you take the temperature and why?

3. Make up an emergency bed and admit a patient. What reports if any would you make to the surgeon? Explain in detail.

4. Suppose a patient has a severe injury in the head, his temperature is 104° Fahrenheit. What kind of a bath would you give him, considering his high temperature?

5. Name all the means you know of for the reduction of high temperature, using water as an antipyretic. Select one of them and explain its technic.

6. What is a turpentine stupe? How do you prepare one and when is it especially indicated? Explain its action in every detail and what precautions, if any, would you guard against in applying one?

7. What are poultices used for? Name as many as you remember and prepare one of them.

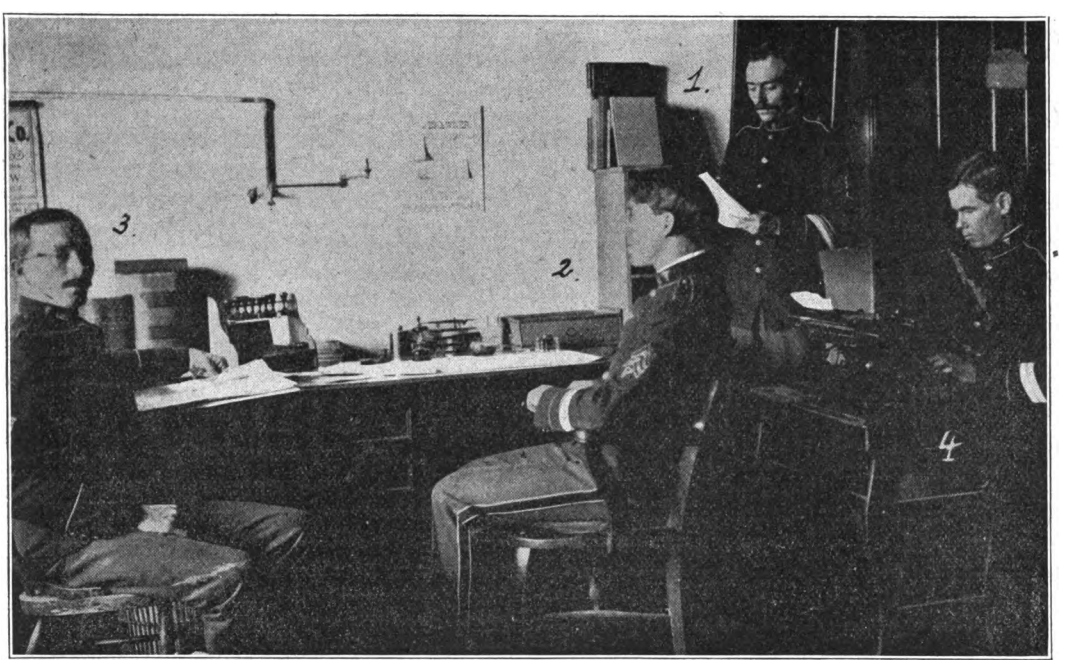
8. What is an enema? When is it indicated? Explain as fully as you can in the manner you proceed to give one. In what principal diseases are they of value?

9. Define the following terms: Bulimia, insomnia, subsaltus, carphaligia, cyanosis, congestion, period of incubation, contagion and infection.

10. What are prodromal symptoms? Mention some disease in which they occur. Also a pathognomic symptom.

11. Disinfect the following: Clinical thermometer, bed pan and urinal, soiled infected bed linen, shoes and personal apparel.

12. What is a hot pack? Give one and explain the precaution you would guard against in a case of organic heart disease? Where is it especially indicated?



**Main Office, Company A, Hospital Corps, United States Army General Hospital, Washington Barracks, D. C.**

The above picture represents one of the busiest and best systematized offices in the United States Army, being the main office of a group of three occupied and required by Company A, Hospital Corps, United States Army General Hospital, Washington Barracks, D. C., to accommodate the vast amount of administrative work attached to a Company of Instruction with a strength ranging as high as 200 men, the majority of whom are recruits and casuals assigned to the company from stations East of the Mississippi for a four months' course of instruction in the multiple duties of a hospital corps soldier.

Captain H. L. Gilchrist, assistant surgeon, United States Army, is in command of the company, and in general supervision of the work of instruction. The office force consists of Sergeant, First Class, Frederick

Digitized by Google

Thomas (1), First Sergeant of the company, in general charge; Sergeant, First Class, Daniel J. O'Sullivan (2), in charge of office and records; Private, First Class, John L. Ferguson (3), and Private James W. Willford (4), clerks and stenographers.

In this office are kept the records and accounts of by far the largest company in the army, and the plans for the instruction and efficiency of its members formulated. This is by no means a small task, and it is estimated that more work is encountered here in a single day than is ordinarily taken care of in a regimental headquarters in a week. So sure and infallible is the system maintained in its administration that errors are unknown, however trivial.

Another feature is that when a student soldier indicates his talent in the class in Clerical Work and Army Regulations he is detailed on temporary office duty for further instruction in penmanship and the preparation of the numerous army reports and papers, and it is needless to say that when this instruction is completed, the soldier is qualified for service on the clerical staff of any office, whether civil or military.

The work accomplished in these three rooms is the foundation upon which the efficiency of the entire organization is based, and as it is the ever present aim of officer and non-commissioned officer alike to increase this efficiency, much deep thought and constant study here finds its application in continual improvement and manifest advancement in the instruction and administration of the company, the logical outcome of which is the graduation of a capable and well instructed soldier, well equipped by his special training and knowledge to serve his government either as soldier or civilian.—[D. O'S.

**The Telescope** came into general use in 1610.

**Emergency Advice No. 2.**

**Don't Crowd Around an Accident and Shut Out Fresh Air.**
(Copyright by Fred Reynolds.)

## STRAY ITEMS AND COMMENTS.

**A Thousand Dollar Drug Stock the Minimum i Kansas.**—The board of pharmacy, in order to mak the road rocky for saloon drug stores, has decided t register only such proprietors as have at least $1,000.0 worth of goods, consisting of drugs, exclusive of wines cigars and side lines. Even soaps are included in th side lines.

**Free Samples of Medicines Delivered at the Resi dence Door** cause trouble when they are indiscreetly used. This practice of carelessly handling medicina substances is the subject of ordinances in a number o cities. Grand Rapids, Mich., is among the very recent places to regulate the distribution or prohibit the practice entirely.

**The Massachusetts Board is Determined** to become acquainted with the druggists of the state. The board consists of five members, and the state has been divided into that number of districts. Each member will visit each druggist in his respective district during 1906. The visits will be the means of education relative to the pharmacy law.

**Mineral Waters** have been examined by the government, and the department of agriculture announces its findings in a number of bottled remedies of this nature. Several of the mineral waters were found to be decidedly deficient in the very salts which they are claimed to contain. This reminds us of the statement of a bottler's journal a few years ago, when the editor said: "It's a wise cork which knows its own pop."

**Farmers and Pharmacists.**—The Texas farmers have a mutual fire insurance company, which has been in successful operation for some time past and makes a good showing in its annual report recently issued. Pharmacists have for many years maintained mutual fire insurance companies in various sections of the country. It is not improbable that the success of the farmers' company will give new life to the movement among pharmacists.

**True Pharmacy Will Prevail.**—At least so announces the *A. Ph. A. Bulletin* in its Latin motto: "*Pharmacia Vera Prevalebit.*" The *Bulletin* is printed on a quality of paper and of a size to conform with the Proceedings of the A. Ph. A. Thus each volume of the *Bulletin* can be bound and added to the library of A. Ph. A. Proceedings. The *Bulletin* is the direct result of a recommendation made by retiring President J. H. Beal at the Atlantic City meeting. It is sent free of charge to all members of the association. The subscription price is $1.00 per year for non-members. Dr. C. S. N. Hallberg is the editor, and No. 1 of Vol. I. gives evidence of the professor's enthusiasm in pharmaceutical work. The annual volume of proceedings of a thousand or more pages will be issued as usual and sent to the members of the association who have paid their dues for the current year.

# ILLINOIS DEPARTMENT.

## What Educational Requirements Should Be Demanded of Applicants for Apprenticeship?

### Expressions From Leading Retail Pharmacists of Illinois.

**The Illinois Board Conference.**—Briefly stated, the concensus of opinion of the retail druggists present at the conference was that, if a college of pharmacy course was desirable, its equivalent, as determined by the board examination, was equally satisfactory, and also that the preliminary examination of the board should determine whether the candidate possessed the necessary education, irrespective of whether he secured it in a high school, or in some equivalent educational institution, or from a private tutor, or, in other words, if the candidate possessed the requisite knowledge either for apprentice, registered assistant or registered pharmacist, no question should be raised as to where or how he acquired it.—[*Western Druggist.*

**Apprentices Should Thirst for Knowledge.**—I am heartily in favor of all movements to elevate the profession of pharmacy. It is best for all concerned, the employe, employer and the public. The time is here when only the best qualified in any profession can succeed. A boy in entering a drug store ought not to stop his educational work no matter how far he has advanced, if even he has graduated from a high school it will be well if he could broaden by a college course and then a course in pharmacy. Many of our failures are due to insufficient knowledge and reasoning powers; there is entirely too much of the commercial spirit abroad. If only we could get to the solid belief that what a man is, and not what he has constituted real success, there would be no trouble. I am sorry that it is necessary to pass laws to compel people to be educated. There needs to be a hungering and thirsting for wisdom. The mere success of the accumulation of earthly treasure is far too low a standard intended for man. He is to be great in knowledge and wisdom, and that means power; power over self, over others and over Nature—a king to rule.—[GEO. C. BARTELLS, Camp Point, treasurer I. Ph. A.

**The Situation in Illinois** is quite different from that in most other states. A young man or woman entering a drug store must apply for registration as an apprentice and pass a satisfactory examination and serve a specified time before becoming eligible to register as an assistant pharmacist. This second step leady to registration as a pharmacist. It is proposed by some educators in Illinois to make an effort to secure a law which will require the druggists to accept as apprentices only such persons as have had at least one year of high school training. The columns of the MEYER BROTHERS DRUGGIST are open for a discussion of the subject.

The report of a conference of representatives of the retail druggists, the teachers and the board of pharmacy was published in full on page 384 of our December, 1905 issue. Editorial comment was made on page 361 of the same issue. Further comment appears on page 24 of the January, 1906, issue. On the same page we also publish expressions from President Christian Garver, of the I. Ph. A., and from ex-President Paul G. Schuh. Below we give further expressions, and we invite still additional comments from the retail drug trade of Illinois. The question is:

Are the registered pharmacists of Illinois ready to select as apprentices only those persons who have had at least one year of high school training?

**A Good Head and Common Sense Important.**—You wish an expression from me on the Illinois apprentice question, whether it should be one year in high school or not before registering as apprentice. Well, that is a poser for all of us, owing to present conditions. You might say, what for? Almost anyone can work in a drug store and fill the majority of so-called prescriptions. You take your prescription from the customer, look at it, immediately rush to the 'phone, order it on the jump, so that you will not keep that precious customer waiting too long; you know she has been shopping all afternoon, and decided to have that prescription filled immediately, so that she can catch the next car. You chase the boy ahead, then order somebody's $9.00 a dozen per 8 ounce mixture of concentrated exdamphooline. What you need next is a fine quality of corkscrew. You need not use a graduate, as it calls for the original bottle, but you must put in a good cork, as the manufacturer don't care a —— about it, and knows you carry such a fine selection of corks. Finally you get all together and have had the pleasure of dispensing a modern, up-to-date, sky-scraping, galenical prescription.

J. E. HUBER

Such is what they find in the modern pharmacy. Your stock of crude drugs are wormy, owing to the lack of exercise; your fluidextracts are drying up; your solid extracts are hard now, devilish hard; your tinctures you make in the smallest quantities; your ointments you almost make extemporaneously; but when it comes to the great life-saving, money-making time-annihiliation preparations for the modern physician, who has been trained in the modern, on-the-surface medical school, there is where you climb all over your shelving to get at the stock. What do we care if the Pharmacopœia contains assay processes for the alkaloid-containing drugs? Makes no difference if cinchona contains coaloil or salt; but they should standardize all the leading proprietary remedies

Digitized by Google

Listerine, Lydia Pinkham's Compound, Peruna for the per cent of gin, Hayden's Viburnum Compound, etc. Assay process should be added for some of the homeopathic proprietary remedies, Munyon's for instance, especially an assay for freshness.

When we employ a new pharmaceutical boy, we take him in the back room—called at one time a laboratory, now a museum for what at one time we prided ourselves on the utensils it contained—show him some of the former objects and explain to him: That is a mortar, formerly much used for contusing, crushing and powdering drugs, chemicals, etc.; the making of pills, mixtures, emulsions, etc., also found its use. Over there under that shelf are a few graduates; they were much used for measuring liquids when physicians wrote prescriptions stating the quantity of the ingredients; at that time they used to be familiar with the doses of medicines and were very exact in what they prescribed. I have known it to be the case where a physician would come in and ask the per cent of certain ingredients of a preparation he intended using. This here bullet mold is what is called a suppository machine; the cobwebs are quite thick about it now, but we might clean it and take a look at it. This peculiar looking affair is not a miniature washboard, but a pill cutting machine, used to divide the rolled mass, called a pipe for short, but now rarely used, owing to the prevalence of so-called tablets and ready made pills.

Everything comes ready made now, it is so handy, they say, requires less brain work; brain fag will be quite uncommon, as this will be cured by its absence.

So we might go on explaining the lost art to our youthful apothecary, but then we must keep up with the times and adjust ourselves accordingly; which we do. As far as education goes, you cannot get too much of it. It is the finest stock to put in and sell at a profit. You back your brain material against the public, and if you have a superior brand of it, you need not cut the price, as it will sell itself. No one ever knew it all or owned the whole stock; it is one of the few articles that cannot be formed into a trust.

**High School Graduates Will Not Enter Pharmacy.**

With the apprentice who applies for a position I believe a good grammar school education at the present time is sufficient, providing he carries a good head, has sense enough to be polite and willing to learn from others. A high school education would be better, but it is not possible to get high school graduates to enter pharmacy with the hours at present, as there are a great many places they can get equally as remunerative, besides they have to go to college again, provided they want to fit themselves as others and be their equal. Consequently it makes it rather hard to find your ideal apprentice.

Rather than commence making too stringent laws for the apprentice, it seems to me it would be better to work for a law, if possible, not to allow any one excepting a licensed pharmacist to own and conduct a pharmacy, as you will see, on looking over statistics, most of the evils injected are caused by persons owning or conducting a pharmacy under a registered pharmacist, they furnishing the money running the establishment under the protection of the aforesaid registered pharmacist. They are only in it for what they can leech from some one else, have nothing in common with the professional pharmacist, and are the ones, as a rule, who run a so-called up-to-date pharmacy. We are for education from first to last, but conditions make it such that we believe it best to let well enough alone.—[J. E. HUBER, Peoria, third vice-president I. Ph. A.

## NEWS FROM HERE AND THERE.

**The Maryland Pharmacy Law** is to be amended, that is, in case the present movement among prominent pharmacists is carried to its logical conclusion. What state has a pharmacy law which exactly suits the pharmacists?

**German View of American Chemical Industry.**—According to Consul-General Guenther, of Frankfort, Dr. Paul Kohn, who was a delegate from the Austrian department of commerce to the World's Fair at St. Louis, and a member of the international jury, has written an essay on the chemical industry in the United States with particular reference to the scientific education for the same. He says, in conclusion, that as in every other industrial branch, the United States has also made the most rapid progress in chemical industry and has made good use of the experience of Europe. Aided by the tremendous wealth of raw materials, a free form of government and American energy it has developed marvelously, but one thing is lacking, i. e., the close connection between science and practice, which is especially existing in Germany. —[*Oil, Paint and Drug Reporter.*

**The Naming of Proprietary Medicines.**—The special committee of the American Medical Association consisting of Dr. O. T. Osborne and Dr. C. S. N. Hallberg, submitted a report on the above subject at the 1905 annual meeting. The report closes as follows:

"It is recommended that every medicinal article have a scientific title or descriptive name, and that the exclusive control of an article through registration of the name as a trade-mark or through copyright, be regarded as a perversion of the purpose and function of the patent laws. The greatest manufacturers, those who have attained the greatest reputation, prestige and patronage of the medical profession, even today, are those who rely on their names as the criterion for the quality of their products. What trade-name product has ever enjoyed the reputation of Powers & Weightman's quinin, Rosengarten's hypophosphites, Mallinckrodt's potassium iodid, Squibb's chloroform, Parke, Davis & Co.'s fluidextracts, Wyeth's elixirs, etc.? Manufacturers are short-sighted to ape the methods of the anonymous and pseudochemical companies in employing trade names, thus losing the prestige their names would confer on any other products they may introduce from time to time."

# ILLINOIS BOARD OF PHARMACY.

**Secretary F. C. Dodds** (Springfield), of the State Board of Pharmacy, is sending a letter to every registered pharmacist in the state, calling attention to the provisions of the pharmacy law that are not clearly understood by all druggists, and other matters of importance to them. The letter is being sent out with the annual certificates. It is as follows:

**State of Illinois Board of Pharmacy.**

To the Registered Pharmacists of Illinois: I am directed by the State Board of Pharmacy to call your attention to the following provisions of the pharmacy law and other matters of importance to registered pharmacists:

**Temporary Absence.**

Section 1 provides that every drug store in the state must be under the direct charge of a registered pharmacist. A slight exception is made in Section 6, which provides that any assistant pharmacist shall have the right to act us clerk or salesman in a drug store or pharmacy during the "temporary absence" of the registered pharmacist.

The board construes the words "temporary absence" to mean that the assistant pharmacist may have charge of the store only while the registered pharmacist has gone to his meals, or any other like necessary duty requiring no more time than is generally so consumed.

**Apprentice Registration.**

Section 7 of the law is in regard to the registration of apprentices. It is as follows:

"It shall be the duty of registered pharmacists who take into their employ an apprentice for the purpose of becoming a pharmacist to require said applicant to at once apply to said board of pharmacy for registration as apprentice, and the said board of pharmacy shall have the right to require such an examination as shall establish the educational qualifications of the applicant, and the date of experience required of applicants for assistant or registered pharmacist shall be computed from the date of registration as apprentice. The board of pharmacy shall furnish proper blanks for this purpose and issue a certificate of registration as a registered apprentice upon the payment of two dollars."

You will observe that it is the duty of a registered pharmacist who takes into his employ an apprentice for the purpose of becoming a pharmacist to at once apply to the State Board of Pharmacy for his registration as an apprentice. It is also of great interest to the apprentice to become registered at the earliest moment possible, since under the law the drug store experience required of applicants for assistant pharmacist or registered pharmacist commences with the date of apprentice registration.

A certificate as a registered apprentice does not give authority to the holder thereof to compound, recommend, dispense or sell drugs, medicines or poisons, except under the immediate supervision of a registered pharmacist, and must not be construed to empower the holder thereof to exercise the duties of a registered pharmacist or assistant pharmacist, nor to conduct a drug store during the absence of the registered pharmacist. If a registered apprentice is left in charge of a drug store, it is a clear violation of the pharmacy law.

**Expose Your Certificate.**

Section 8 provides that every certificate of registration shall be conspicuously exposed in the pharmacy or drug store to which it applies. Any person violating this provision is liable, upon conviction thereof, to pay a penalty of not less than $25.00 nor more than $50.00.

This provision applies to the certificate of every registered pharmacist, every assistant pharmacist and every registered apprentice, and the board especially requests a proper compliance with it.

Section 8 also provides that the name of the registered pharmacist who conducts a drug store or pharmacy shall be conspicuously displayed over the door or department. A proper compliance with this provision is also requested.

**Labels.**

Section 12 refers to labels. It is as follows:

"No person shall sell at retail any drug, medicine or poison without affixing to the box, bottle, vessel or package containing the same a label bearing the name of the article distinctly shown, with the name and place of business of the registered pharmacist from whom the article was obtained. Provided, nothing in this section shall apply to the sale of patent or proprietary medicines when sold in original packages, nor with the dispensing of physicians' prescriptions. Any person failing to comply with the requirements of this section shall be liable to a penalty of $5.00 for any and every offense."

This means that a printed, written or stamped label or tag must be affixed to every box, bottle, vessel or package containing any drug, medicine or poison. The label or tag should give the name and place of business of the registered pharmacist, from whom the article was obtained.

You will observe that this section does not apply to the sale of patent or proprietary medicines when sold in original packages, nor to the dispensing of physicians' prescriptions.

**Adulteration and Substitution.**

Section 14 refers to adulterations and substitutions, and provides a penalty of $50.00, together with all costs and expenses, for adulterating or altering any drug, medicine chemical or pharmaceutical preparation, or substituting one material for another.

According to a recent opinion of the attorney general of the state, the 1890 edition of the U. S. Pharmacopœia will remain the standard of purity until the 1900 U. S. Pharmacopœia is adopted by legislative enactment.

The board is determined to protect the honest, law-abiding druggists against the unscrupulous competition of the druggists who substitute and adulterate their preparations. You have nothing to fear if your preparations are according to either the 1890 or 1900 Pharmacopœia. If they are not according to either you are liable to prosecution.

**Cocaine.**

Section 14b relates to the sale of cocaine. It provides among other things that the certificate of a

Digitized by Google

pharmacist who has been twice convicted for its illegal sale shall be revoked.

The board wants to impress upon you the fact that this provision applies to all pharmacists and that the certificate of a clerk may be revoked the same as the certificate of the proprietor of a drug store.

**Poisons.**

Sections 62 and 63 of the Criminal Code refer to the sale of poisons, These sections are as follows:

Section 62. "Every druggist or other person who shall sell and deliver any arsenic, strychnine, corrosive sublimate, prussic acid, or other substance or liquid usually denominated as poisonous, without having the word 'Poison' written or printed upon the label attached to the phial or parcel in which such drug is contained, or shall sell and deliver any drug or medicine other than upon the prescription of a physician, without having the name of such drug or medicine printed or written upon the label attached to the phial or parcel containing the same, shall be fined not exceeding $25.00."

Section 63. "If any druggist or other person sells or gives away any arsenic, strychnine, corrosive sublimate or prussic acid, without the written prescription of a physician, and fails to keep a record of the date of such sale or gift, the article and amount thereof sold or given away, and the person to whom delivered, he shall be fined not exceeding $50.00 for each neglect. Whoever purchases any such poison and gives a false or fictitious name shall be punished in the same manner."

Your attention is called particularly to the requirements of the above sections.

**Violations of Law.**

If you know of any violations of the pharmacy law, please notify the board of pharmacy at once. All correspondence concerning violations will be regarded as strictly confidential. We are making a determined effort to stop violations of the law, and need your assistance.

**Change of Address.**

If you change your address at any time during the year, please notify this office at once, in order that we may change our registration books accordingly and that mail from this office may reach you promptly.

**Deaths.**

Please notify this office of the death of any registered pharmacist or assistant pharmacist occurring within your knowledge during the year, giving the date thereof, if possible.

---

**Is Your Will Lawyer Proof?**—The late Mr. Weightman, head of the great firm of Powers & Weightman, prided himself upon having signed a will which would dispose of his property to his own liking and which was absolutely lawyer proof. His well laid plans, however, seem to have gone astray, for his immense estate is now in litigation, and the lawyers are the only ones absolutely certain of enjoying a good share of the estate. Mr. Weightman lived to an unusually old age, and until the very last directed his business affairs.

---

**In New Mexico,** a prospective pharmacist can take an examination before any member of the board and, if successful, be granted a temporary permit to practice pharmacy until the regular meeting of the board.

# STRAY ITEMS AND COMMENTS.

**Complexion Powder and Perfume are in Great Demand in Cuba,** at least, so says the *Galveston News*. According to that authority, a commission merchant of Havana claims that complexion powder is used by the ton in Cuba. It is claimed that most of the perfume used in Cuba comes from France.

**Whiskey Drug Stores in Missouri** are having a hard time of it. The board of pharmacy prosecutes those managed without a registered pharmacist. The board of health revokes the license of physicians who prescribe intoxicating liquors otherwise than for medicinal use. The dram shop local license fee is demanded of those who hold a government internal revenue license. The saloon men of the state claim that Governor Folk is ruining their business, but the saloon drug stores blame the board of pharmacy, the board of health and the license.

**April 1, 1906, Remains the Date.**—We refer to the time designated by the commissioner of internal revenue for the enforcement of the new ruling relative to the sale of medicines which may be used as intoxicating drinks. On and after April 1, 1906, it will be necessary for a retail druggist to have an internal revenue license as a retail liquor dealer in order to sell any of the following goods:

Kudros.
Peruna.
Cuban Gingeric.
Duffy's Malt Whiskey.
Rockcandy Cough Cure.
Dr. Bouvier's Buchu Gin.
DeWitt's Stomach Bitters.
Dr. Fowler's Meat and Malt.
Hostetter's Stomach Bitters.
Atwood's La Grippe Specific.
Gilbert's Rejuvenating Iron and Herb Juice.

**English Pharmaceutical Poetry.**—The *Chemist and Druggist* of London has for years followed the plan of offering small prizes to pharmacists who send in particularly acceptable verses relative to some good subject. As an example, our exchange publishes illustrations representing botanical terms. In a recent issue, the illustration represented a pharmacist making use of the old-fashioned knife used in cutting crude drugs. The readers were asked to name the part of the plant represented, the answer being the "blade." Among the verses received were the following which give a fair idea of what is looked upon a interesting pharmaceutical doggerel by the readers of the pharmaceutical press of England.

Ammonio lumps,
Chemist bumps,
Blade jumps,
Fingers—stumps.

Another good reply was as follows:

With the *blade* of the cutter, I fear,
An accident has happened here;
In cutting a root,
It is not very cute
To get your four fingers too near.

# PROPOSED LEGISLATION.

## Drafts of Bills Relating to Sales of Narcotics and of Proprietary Medicines Containing Alcohol.

On December 27 and 28, 1905, upon the invitation of the legislative committee of the American Pharmaceutical Association, a conference was held at the Hotel Stratford in Chicago to consider legislation to regulate the sale of narcotics and proprietary compounds containing alcohol. There were present at this conference delegations representing the American Pharmaceutical Association, the Proprietary Association of America, the National Wholesale Druggists' Association and the National Association of Retail Druggists.

The delegates were not authorized to take final action as to any particular form of a law, but were merely appointed to confer together and refer back to the bodies which appointed them. There was considerable discussion and the following was regarded as a good working basis for a discussion of possible laws to regulate the sale respectively of narcotics and of proprietary compounds containing alcohol.

ALBERT E. EBERT, of the American Pharmaceutical Association; J. M. GOOD, of the National Association of Retail Druggists; M. N. KLINE, of the National Wholesale Druggists' Association; JOHN W. KENNEDY, of the Proprietary Association of America.

### A Bill

To Provide Against the Evils Resulting from the Traffic in Certain Narcotic Drugs, and to Regulate the Sale Thereof.

Be it Enacted by the General Assembly of the State of———.

Section 1. That it shall be unlawful for any person, firm or corporation to sell, furnish or give away any cocaine, alpha or beta eucaine, opium, morphine, heroin, chloral hydrate or any salt or compound of any of the foregoing substances, or any preparation or compound containing any of the foregoing substances, or their salts or compounds, except upon the original written order or prescription of a lawfully authorized practitioner of medicine, dentistry or veterinary medicine, which order or prescription shall be dated and shall contain the name of the person for whom prescribed, or if ordered by a practitioner of veterinary medicine shall state the kind of animal for which ordered, and shall be signed by the person giving the prescription or order. Such written order of prescription shall be permanently retained on file by the person, firm or corporation who shall compound or dispense the articles ordered or prescribed, and it shall not be again compounded or dispensed, except upon the written order of the original prescriber for each and every subsequent compounding or dispensing. No copy or duplicate of such written order or prescription shall be made or delivered to any person, but the original shall at all times be open to inspection by the prescriber and properly authorized officers of the law.

Provided, however, that the above provisions shall not apply to preparations containing not more than two grains of opium or not more than one-fourth grain of morphine, or not more than one-fourth grain of heroin, or not more than one-eighth grain of cocaine, or not more than one-eighth grain of alpha or beta eucaine, or not more than ten grains of chloral hydrate, in one fluidounce, or if a solid preparation, in one avoirdupois ounce. Provided, also, that the above provisions shall not apply to preparations containing opium and recommended and sold in good faith for diarrhoea and cholera, each bottle or package of which is accompanied by specific directions for use, and a caution against habitual use, nor to powder of ipecac and opium, commonly known as Dover's Powder, nor to liniments or ointments, when plainly labeled "for external use only." And, provided further, that the above provision shall not apply to sales at wholesale by jobbers, wholesalers and manufacturers to retail druggists or qualified physicians, or to each other, nor to sales at retail by retail druggists to regular practitioners of medicine, dentistry or veterinary medicine, nor to sales made to manufacturers of proprietary or pharmaceutical preparations for use in the manufacture of such preparations, nor to sales to hospitals, colleges, scientific or public institutions.

Section 2. It shall be unlawful for any practitioner of medicine, dentistry or veterinary medicine to furnish to or to prescribe for the use of any habitual user of the same any cocaine, heroin, alpha or beta eucaine, opium, morphine, chloral hydrate, or any salt or compound of any of the foregoing substances or any preparation containing any of the foregoing substances or their salts or compounds. And it shall also be unlawful for any practitioner of dentistry to prescribe any of the foregoing substances for any person not under his treatment in the regular practice of his profession, or for any practitioner of veterinary medicine to prescribe any of the foregoing substances for the use of any human being.

Provided, however, that the provisions of this section shall not be construed to prevent any lawfully authorized practitioner of medicine from furnishing or prescribing in good faith for the use of any habitual user of narcotic drugs, who is under his professional care, such substances as he may deem necessary for their treatment, when such prescriptions are not given, or substances furnished, for the purpose of evading the provisions of this act.

Section 3. Any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction for the first offense shall be fined not less than $25.00 nor more than $50.00, and upon conviction for a second offense shall be fined not less than $50.00 nor more than $100.00, and upon conviction for a subsequent offense shall be fined not less than $100 nor more than $200, and shall be imprisoned in the county jail for not more than six months, and if a licensed pharmacist, physician, dentist or veterinary surgeon, his license shall be revoked. It shall be the duty under this act of all judges of the courts of common pleas in this state, at every regular term thereof, to charge all regular impaneled grand juries to diligently inquire into and investigate all cases of the violation of the provisions of this act, and to make a true presentment of all persons guilty of such violations. It shall be the duty of the board of pharmacy to cause the prosecution of all persons violating the provisions of this act. No prosecution shall be brought for the sale of any patent or proprietary medicine containing any of the drugs or preparations hereinbefore mentioned until the board of pharmacy shall certify that such medicine contains any of the said drugs or preparations in excess of the maximum percentages hereinbefore mentioned.

Section 4. In any proceedings under the provisions of this act the charge may be brought against any or all of the members of a partnership, or against the directors or executive officers of a corporation, or against the agent of any person, partnership or corporation.

Section 5. All laws and parts of laws in conflict with this act are hereby repealed.

Section 6. This act shall take effect and be in force from and after the.... .....day of..... .....19....

### A Bill

To Regulate the Sale of Certain Proprietary Medicines.

Be it Enacted, etc.

Section 1. Any proprietary medicine which contains a percentage of alcohol greater than is reasonably necessary for the extraction and dissolving of the active constituents of the drugs used in the preparation of said medicine, or to prevent the precipitation of such active constituents, or to preserve the medicine from fermentation or freezing, shall be deemed to be an intoxicating liquor, and shall be sold only under the provisions of the law regulating the sale of intoxicating liquors. Provided, that this act shall not be construed to apply to preparations compounded according to any formula embraced in the United States Pharmacopœia or the National Formulary, when sold under a title recognized by the said United States Pharmacopœia or National Formulary.

Section 2. No prosecution shall be brought for the sale of any proprietary preparation in violation of the provisions of this act unless the board of pharmacy shall, after due investigation, certify that such proprietary preparation contains alcohol in a percentage greater than the limit fixed by Section 1.

# PHARMACEUTICAL ASSOCIATIONS.

## Looking Forward to the 1906 Mo. Ph. A. Convention.

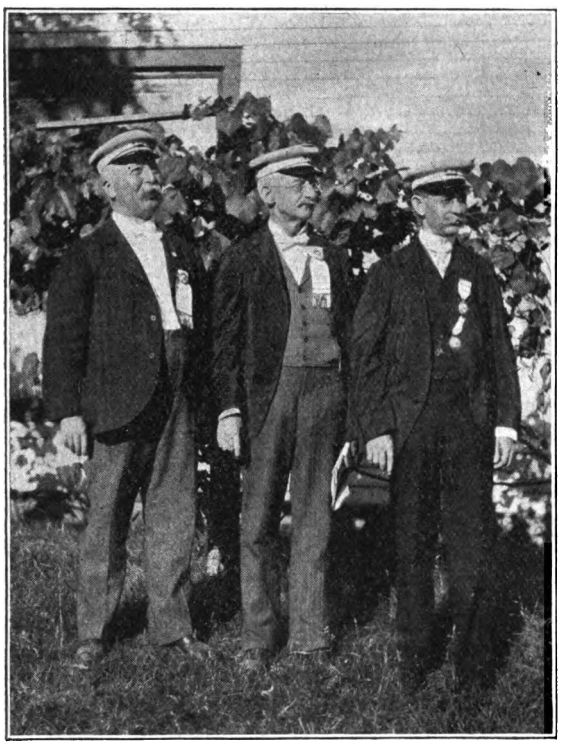

Photo by Meyer Brothers Druggist.

These three ex-presidents were caught by the camera at the Pertle Springs (Warrensburg) 1905 meeting while talking over their experiences as president of the association and planning for work at the 1906 meeting. Reading from right to left, they are: William Mittelbach, treasurer, Boonville; Charles L. Wright, councilman, Webb City; Professor Francis Hemm, chairman, Committee on Papers and Queries, St. Louis.

**First Convention of the Women's Organization of the N. A. R. D.**—This is the day of organization, so, coming into line and acting upon the many hopes expressed at the Boston meeting of the N. A. R. D. that the meeting of the ladies might prove a permanent feature, the Women's Organization of the N. A. R. D. was formed at the Massachusetts College of Pharmacy, December 11.

MISS MARY FEIN

The new organization met with a very cordial reception, as evinced by the hearty approval and assurances of co-operation expressed in letters and telegrams received by the secretary from all over the country. The enthusiasm of secretaries of state pharmaceutical associations and local organizations of the N. A. R. D. promises well for the future of the new movement.

Good counsel and best wishes came also from Mr. Wooten. One correspondent writes: "Your first gains must necessarily be in the cities. Those in the country must be depended upon, through the state associations by missionary work at the spring meetings."

Objects.—The objects of the organization shall be:

1. To unite more closely, socially, the families of those interested in the retail drug business throughout the United States.
2. To forward such good objects in reformatory and educational lines as may from time to time present themselves.
3. To disseminate useful information and to expose fraud and adulterations of foodstuffs and drugs which may be imposed upon the public.
4. To cultivate a knowledge of the interests of the N. A. R. D. and allied associations of the drug trade and seek to further them.
5. To unite the representatives of local associations of women in the United States into a central body for the betterment of social and business conditions of the retail drug trade and cooperate with other organizations having similar aims.
6. To encourage mutual improvement.

The constitution and by-laws, as presented by the committee, were adopted.

Luncheon was served in the intermission between the morning and afternoon sessions.

The following officers were elected:

President—Mrs. Emma G. Wallace, Boston.
Vice-President—Mrs. Thomas Voegili, Minneapolis, Minn.
Vice-President—Mrs. L. G. Heinritz, Holyoke, Mass.
Secretary—Mrs. Adelaide M. Godding, Boston.
Treasurer—Mrs. Chas. Avery, Chicago, Ill.
*Board of Management*—Mrs. W. A. Pierce, West Chester, Pa. Mrs. Edgar Sparks, Burlington, N. J.; Mrs. O. H. Brown, Council Bluffs, Ia.; Miss Mary Fein, Little Rock, Ark.

Miss Helen A. Whittier, president of the Massachusetts State Federation of Women's Clubs, addressed the convention on the power of organization and the work of the General Federation of Women's Clubs, and suggested there is much to do along the lines of pure foods and pure drugs.

The annual dues were fixed at $1.00.

It was voted to hold the annual meeting at the same time and place as the N A. R. D.

Resolutions of thanks were passed to be extended to the B. A. R. D., the N. A. R. D. and the pharmaceutical journals for their assistance.

It was voted to form a local Boston organization, to be called Chapter I.

The meeting adjourned with the hope that, by patience and earnest endeavor, we might grow to be a large, helpful and harmonious organization.—[ADELAIDE M. GODDING, secretary.

**Fish Isinglass as a Wine Clarifier.**—In a case coming up on appeal, the supreme court of the German Empire has decided that the use of fish isinglass dissolved in tartaric acid to clarify wine is not permissible, and is subject to penalty. Wine thus treated is to be considered adulterated on account of the acid added.—[CONSUL-GENERAL GUENTHER, Frankfort Germany.

Digitized by Google

# STRAY ITEMS AND COMMENTS.

**The N. A. R. D. Executive Committee** will hold a semi-annual meeting at Chicago, February 12. It is needless to say that important matters will be considered.

**Good Crops and Good Trade** promised in the Northwest. The January snow storms mean much for the drug trade and general trade of Oregon, Washington and that section of the country. Where rain fails to fall in summer or spring snow must come in the winter if crops are to be watered.

**Pharmacists and Health Officers.**—The New York City Health Department, through Commissioner Darlington, has provided for a new advisory committee on matters relating to pharmacy. The members of the new committee are: Dr. William C. Alpers, Felix Hirseman, Clarence O. Bigelow, Dr. William Muir and C. H. Bernstein.

**The Loader Case.**—Last fall a Philadelphia cutter named Loader sued the local druggists, the N. A. R. D., the N. W. D. A. and everything else pharmaceutical in sight for placing restrictions upon the goods sold to him. Early in January, a jury gave the defendant $20,000.00 damages which, under the laws of the state, would amount to nearly $60,000.00 on account of a special provision covering such cases. A motion was made at once by the defendants for a new trial. January 22, the motion for a new trial was denied but the amount awarded by the jury cut down to one-half. The defendants will now appeal the case and, if necessary, take it to the supreme court.

**Important Warning for Arkansas Pharmacists.**—The board of pharmacy has generously issued a warning to those engaged in the drug business in Arkansas. The board calls attention to a recent decision of the supreme court of the state which plainly shows that every druggist who either wittingly or unwittingly sells a medicine which can intoxicate must pay the government internal revenue license and also take out a state, county and city license as a retail liquor dealer. The Arkansas Blind Tiger Act of 1883 makes the possession of a United States liquor license prima facie evidence of the guilt of the party owning or controlling the house. This act must be kept in mind by those druggists of Arkansas who intend to pay the government internal revenue license in order to sell on and after April 1, the list of medicines which the internal revenue commissioner says can be sold only under the protection of such a license.

**A Bill to be Killed by the Pharmacists and Physicians of Mississippi.**—It is known as House Bill No. 53 and carries to an extreme the agitation against alcoholic preparations and narcotic remedies recently started by the *Ladies' Home Journal* and some other similar publications. Those back of the bill are either ignorant of its wide-reaching effect or have ulterior motives in pushing it. The retail drug trade, the jobbers, manufacturers and the medical profession as well should use united influence in preventing the passage of such a bill. The information comes just as we go to press, so we can give space to but one section which is a fair sample of the entire bill. Section 4 reads as follows:

"Every proprietary drug, medicine or beverage containing more than five per cent of ethyl alcohol, or which contains chloral hydrate, ergot, morphine, opium or any of their compounds or derivatives, cocaine or any of its salts, bromide, iodine or any of their salts, shall be clearly labeled in black open gothic letters printed on a white background, showing the true composition and the per cent of each constituent, and said label shall be affixed to each and every package, carton, box or bottle in such a way as to be clearly seen."

As a substitute bill covering these points, see page 44 of MEYER BROTHERS DRUGGIST for February.

**Chicago Branch of the A. Ph. A.**—Acting on the recommendation of the committee on local organization adopted at the annual meeting, members in Chicago and other pharmacists interested in the objects and purposes of the A. Ph. A. gathered in the Northwestern University Building, Tuesday evening, January 16.

The meeting was called to order by Oscar Oldberg who congratulated those present on their evident interest in the object of the call by braving the inclement weather.

C. S. N. Hallberg was elected temporary chairman and C. M. Snow, secretary.

The chairman reviewed recent efforts to increase the usefulness of the A. Ph. A., and the desirability to increase the membership. Expressions of similar views were heard from nearly every one present, some regretfully admitting that while they realized that they had indirectly been benefited by the work of the association, they had never been able to attend the annual meetings and therefore had not become members.

With a local branch society holding monthly meetings they would gladly join the association.

Among those present who participated in the discussion were the following:

Retail Pharmacists: Messrs. Adamick, H. Fry, Klenze, Martin and Miss Stahl.

Hospital Pharmacists: Messrs. Backer and Von Zelinski, Misses Pierce and Stimson.

U. S. P. H. and Marine Hospital Service: Mr. Watters.

Manufacturing Pharmacists: Mr. Koch.

Physicians: Dr. A. W. Baer.

Northwestern University, School of Pharmacy: Messrs. Oldberg, Gordin, Miner, Patterson, Pond, Clothier and Harrison.

University of Illinois, School of Pharmacy: Messrs. Hallberg, Day and Snow.

Wholesale Druggists: I. G. Lewis, of Robt. Stevenson & Co., regretted inability to attend, but wished to extend his well-wishes.

Messrs. Hallberg, Patterson and Snow were formed a committee on Permanent Organization and Program to report at the next meeting, Northwestern University Building, Tuesday, February 13, 8 p. m.

# PROTECT FROM LIGHT.

## The Preservation of Medicinal and Chemical Substances.

BY F. A. UPSHER SMITH.

Communicated to the Sheffield Pharmaceutical and Chemical Society on Wednesday, January 10, 1906. Reprint from *Pharmaceutical Journal*, January 13, 1906.

The difficulty of preserving medicinal and chemical substances in their original condition can not be overrated. It seems to me, on the contrary, that far too little attention is paid to the subject. In an earlier paper read before this association,† I gave a list of substances which are prone to deteriorate on keeping, and made several recommendations, based on a more general use of amber glass bottles. Quite recently‡ Mr. F. H. Alcock gave an important address on "The Instability of Solutions," giving many instances of instability in medicinal and chemical substances and the methods of overcoming them. A careful perusal of the new United States Pharmacopœia has again brought the subject prominently before me, and I think I can not do better this evening than return to my former theme. The new Pharmacopœia contains copious notes on the best methods of preserving medicinal and chemical substances. When nearly two years ago I submitted for your consideration a lengthy list of the substances which, in my opinion, should be protected by amber glass from the action of the actinic rays of light, I scarcely anticipated that within a short time the United States Pharmacopœia would so generally prescribe the use of amber glass. A valuable contribution to the subject has been made by Madsen.* He used bottles of red, white, yellow and green glass, and exposed various substances in them for a given time. The light varied, as the sun is capricious, both sunlight and diffused daylight contributing their action. The substances employed included concentrated water of bitter almonds, chloroform, powdered digitalis, stramonium leaves, fennel fruit, pyrogallic acid, yellow iodide of mercury, diluted alcohol colored with cochineal, and hydrogen peroxide, all of which were protected better by orange and red glass than by white. In the case of solution of perchloride of iron no decided difference was observed, and in the case of silver nitrate red glass afforded better protection than orange or white. He also took one per cent solution of cocaine hydrochloride and found that after twelve months solutions preserved in orange and red glass failed to give Maclagan's test.

Prof. Greenish has kindly sent me, in addition to the above, particulars of some experiments made by Möller on the protection afforded by differently colored glass. His experiments were mostly made with paper impregnated with various salts, *e. g.*, a mixture of ammonium oxalate and mercuric chloride, which rapidly yields mercurous chloride on exposure to sunlight. He found that black, red, orange, dark yellow and brown glass protect best; that ordinary brownish-yellow glass, dark green and dark brownish-green protect well; and that bluish-green, violet, opal, blue and colorless glass protect very little, or not at all.

I propose to call your attention to the substances contained in the United States Pharmacopœia which are to be stored in amber bottles, and to a selection of substances for the preservation of which special precautions are to be observed. I shall then draw a few general conclusions in the hope that the preservation of medicinal and chemical substances may be an object of greater solicitude than it is at present. Since the publication of my first paper I have had several inquiries from pharmacists as to the fitting up of a pharmacy with bottles of amber glass, and I am glad to say that more than one pharmacist has adopted amber bottles for general use. Mr. R. Robertson, of Musselburgh, writes me that after more than a year's trial he is thoroughly satisfied with his amber shop rounds, which are very much admired. The labels show a white ground with a red and gold border for the sake of contrast. They stand on shelves backed with plate glass. Mr. Robertson says that if he were fitting up another pharmacy, he would have no doubt whatever about adopting amber glass. The windows of his storeroom are fitted with amber muranese glass, which gives him great satisfaction.

### Substances in the United States Pharmacopœia Directed to be Preserved in Amber Glass.

Acidum Benzoicum is somewhat volatile at moderately warm temperatures, and acquires a yellow color on exposure to light.

Acidum Hydriodicum Dilutum.—Protect from light.

Acidum Hydrobromicum Dilutum.—Protect from light.

Acidum Hydrocyanicum Dilutum.—Use cork-stoppered vials. By decomposition may yield ammonium formate.

Acidum Nitrohydrochloricum.—Bottles not to be more than half filled.

Acidum Nitrohydrochloricum Dilutum should not be dispensed unless recently prepared.

Acidum Sulphurosum.—

Acidum Trichloraceticum.—Chloroform and $CO_2$ are produced by boiling an aqueous solution.

Aconitina.—

Ammonii Iodidum.—Protect from light. Very hygroscopic, soon becoming yellow or yellowish-brown on exposure to air and light, owing to loss of ammonia and liberation of iodine. The U. S. P. directs that when deeply colored the salt should not be dispensed. It may be deprived of free iodine by adding to its concentrated aqueous solution sufficient ammonium sulphide T. S. to render it colorless, then filtering and evaporating to dryness.

Amylis Nitris.—Use hermetically sealed glass bulbs, or dark amber-colored glass-stoppered vials, in cool and dark place.

# BOARDS OF PHARMACY.

**Commissioners of Pharmacy, Washington, D. C.**—Frank C. Henry, Ph. D., president; Murray Galt Motter, M. D., Treasurer; D. W. Prentice, M. D., Fred T. Hafelfinger, Ph. D., Henry A. Johnson, Ph. D., secretary. All official communications should be addressed to the secretary, 1221 New Jersey Avenue N. W.

Dr. Henry A. Johnson, secretary to the Commissioners of Pharmacy, announces the result of the examination held January 11, 1906, for registered pharmacists. There were four candidates, of which number one was successful, Mr. Stuart A. Tschiffely.

Examinations are held on the second Monday in January, April, July and October. Candidates for examination must file with the secretary their application, together with the fee provided by law, not later than the Monday preceeding the date of the examination.

**Ill. Bd. Ph.**—At the meeting of the Illinois State Board of Pharmacy in Springfield on January 16-17, nine of the nineteen applicants for registered pharmacist and seven out of a class of twelve candidates for assistant pharmacist passed successful examinations. Their names follow:

**Registered Pharmacists.**—Oskar Adler, Chicago; Francis E. Bird, Quincy; E. W. Bothe, Chicago; W. I. Burns, Harvel; Earl W. Cutler, Abingdon; C. A. Demes, Chicago; Herman H. Diesner, Chicago; Wm. V. Dufner, Peoria and Wm. Shaw, Chicago.

**Assistant Pharmacists.**—Jennie M. Duncan, Ottawa; Howard W. Duncan, Mattoon; Roy C. Fritts, Metropolis; John O. Gottrick, Jr., Knoxville; R. E. Hattan, Galesburg; James O. Kelley, McLeansboro and Robert McEvoy, Mound City.

The Board Will Hold a Meeting in Chicago at the Hampden Building, corner Thirty-Ninth Street and Langley Avenue, Tuesday, February 20, for the examination of applicants who have not heretofore passed the preliminary test required by the board. An examination will be held the following day for applicants who have already passed the preliminary test.

The new Pharmacopœia will be used hereafter in all examinations.

**The Indian Territory Board of Pharmacy** held its regular quarterly meeting at Muskogee, October 17 to 19, inclusive, when a class of twenty-one took the examination. Fourteen passed satisfactorily. The board disposed of nearly all applications. L. Matthews' time expired, and his successor, Mr. H. M. Mitchell, of Vinita, was sworn in and the board reorganized, Mr. F. C. Savage elected president, H. D. Kniseley re-elected secretary, and H. C. Cobb, treasurer. The work of the board has been very pleasant and satisfactory to all of them, and the very best of feeling prevails among them. Mr. Mitchell is a graduate of the St. Louis College of Pharmacy, and the board has not lost anything by the change. He has been in business in Vinita about four years, and has won for himself the confidence and esteem of all who know him. Acknowledgement was made of the very efficient services of retiring member L. Matthews who continues his interest in the work

H. M. MITCHELL, PH. G.

**Recently Registered.**

**Ky.**—R. S. Ballowe, Paducah; Frank Bauer, Cincinnati; E. M. Dunn, Lowes; H. W. Ellis, Paducah; M. L. Hall, Shelbyville; F. A. Kannapell, Louisville; R. H. Leslie, Greenup; W. A. McGuire, Woodburn; W. J. Ogden, Louisville; J. E. Passmore, Louisville; H. D. Rutter, Hardin; Elmer C. Showers, Verona; Leo. Reuscher, Newport; V. C. Stubblefield, Murray; Wm. Taylor, Owenton.

The Next Meeting will be held in Louisville, April 10. Applications should be lodged with the Secretary, J. W. Gayle, Frankfort, at least ten days before the meeting.

**North Carolina.**—H. M. Bell, Windsor; Warren H. Biggs, Williamston; M. N. Bogart, Washington; Walter Buhmann, Greensboro; J. E. Burton, High Point; E. S. Cook, Goldsboro; J. S. Hall, Fayetteville; S. P. Fletcher, Harrisonburg, Va.; H. M. Harper, Richmond, Va ; A. K. Hardee, Benson; W. A. Jetton, Davidson; Dr. A. A. Kent, Lenoir; T. G. Levister, Raleigh; G. F. McGee, Greensboro; J. M. Monger, Sanford; E. G. Mullen, Charlotte; L. G. O'Brien, Winston; R. H. Parker, Durham; E. F. Redding, Asheboro; C. A. Ring, High Point; R. B. Suggs, Belmont; J. N. Thomas, Warrenton; F. L. White, Mebane; J. H. Eaton (colored), Winston; F. W. McNair (colored), Greensboro.

The Next Meeting of the board will be held at Wrightsville, Tuesday, June 12, 1906, at 9 a. m.—[F. W. HANCOCK, secretary, Oxford, N. C.

**South Dakota.**—*Licentiates.*—C. B. Warne, Mitchell; Arthur H. Lewis, Ph. G., Canton; Robert Kreiser, Sioux Falls; L. E. Sasse, Henry; O. F. Carlson, Marathon, Ia.; M. E. Sasse, DeSmet; Otto Knorr, Marion; M. W. Scott, Ph. G., Chamberlain; Carl Fjerstad, Ph. G., Estelline; J. W. Koehler, Madison; F. W. Miers, Ph. G., Salem; Austin Towles, Sisseton; Henry Rogness, Sisseton; M. J. Burns, Lake Andes; S. D. Munro, Willow Lakes; Frank Horacek, Tabor; C. E. Harlen, Des Moines, Ia.; Carl Aaseth, Ph. G., Yankton; R. H. Ottman, Ph. G., Lead; H. H. Hartman, Ph. G., Rapid City; R. E. Holvey, M. D., Ph. G., Lead; J. A. Goodall, Terry; C. M. Fallon, Ph. G., Rapid City; Lyman Thompson, Ph. G., Lead; Otto Uhlig, Ph. G., Spearfish; David Goldman, Ph. G., Lead; J. S. Saults, Ph. G., Belle Fourche.

*Assistants in Pharmacy.*—Clarence Boss, Lead; G. E. Gustine, Ph. G., Lead.

*Assistants.*—L. M. Snow, Garner, Ia.; F. L. Mitchell, M. D., Artesian; D. C. Hobert, Faulkton; W. A. Schmidt, Madison; C. M. Corcoran, Rock Rapids; J. H. Halihan, Aberdeen; H. D. Jehu, Geddes; G. A. McCullen, Ph. G., Highmore; J. H. Fish, Parkston.

**Nebraska.**—Ben A. Armitage, Omaha; Carl S. Baum, Omaha; Florence C. Boylan, Eddyville; Jozines Cording, Loup City: Bretislav Dienstbier, South Omaha; Jno. J. Gilsdorf, Bloomfield; M O. Hamel, Davenport; F. J. Hermansky, Omaha; Chas. M. Janecek, Schuyler; Clyde McElmoil, Hastings; Clyde E. Mustoe, Fremont; Pearl Ratcliff, Stratton; Alfred N. Rolland, Omaha; Oscar Ruzicka, Omaha; Geo. Shultz, Omaha; R. S. Baker, Curtis; Geo. L. Blanchard, Craig; E. E. Cathcart, Omaha; Eskil Dahlberg, Wahoo; Samuel E. Ewing, Omaha; Theo. L. Hayden, Omaha; J. P. Harris, Plattsmouth; Lynn J. Irwin, Omaha; Oscar P. Luse, Omaha; Jno. J. Motl, West Point; Paul P. Platz, Schuyler; Henry Rathbun, Omaha; Estella Robinson, Danbury; Chas. Scott, Eustis; Geo. J. Taylor, Omaha.

**Oklahoma.**—S. B. Buchanan, Mangum; Wm. E. Bailey, Carnegie; Carl W. Denney, Lawton; J. L. Fink, Blackwell; E. W. Hiatt, Edmond; C. L. Hunt, Oklahoma City; D. G. Kilburn,

Quincy, Ill.; Edw. Lieurance, Neosha Falls, Kans.; H. Ozanne, Woodward; Chas. A. Ridley, Davenport; Wm. F. Wylde, Perry; J. B. C. Worley, Cache; Earl D. Walker, Meeker; Wm. Zeigler, Pond Creek.

The following were registered upon diplomas from colleges:

E. S. Arnold, Davenport Ia.; Highland Park College.
H. G. Agner, Ottawa, O.; Ohio Northern University.
Jno. H. Bonto, Enid; Oklahoma University.
W. A. Blaesser, Cherokee, Ia.; Northwestern University.
G. G. Curry, Greenville, Pa.; Ohio Northern University.
M. S. Caldwell, Jonesborough, Ark.; Atlanta College of Pharmacy.
Geo. C. Diekman, New York City; N. Y. College of Pharmacy.
C. W. Davis, Tecumseh, Okla.; Oklahoma University.
J. R. Elson, Wellsburg, W. Va.; Scio College.
J. P. Eckers, Oklahoma City, Chicago College.
J. H. Frost, Rockford, Ill.; University of Michigan.
N. E. Hawkins, Scio, O.; Scio College.
J. C. Inman, Bradner, O.; Ohio Northern University.
C. E. Kirschner, Davenport, Ia.; Highland Park College.
J. E. Mertes, Prague, Okla.; University of Michigan.
Perry O. Sheer, Kingfisher, Okla.; Highland Park.
Wm. H. Selig, Cherokee, Okla.; Northwestern University.
A. T. Schleder, Lena, Ill.; Chicago College.
R. E. Thorson, Rock Island, Ill.; Highland Park.
Hite Watson, Oklahoma City, Okla.; Philadelphia College of Pharmacy.
Chas. W. Wagner, McLean, Ill.; Ohio Northern University.

The Next Regular Meeting occurs April 10, 1906, at Oklahoma City, Okla. —[F. B. LILLIE, secretary, Guthrie.

## NECROLOGY.

**Dr. Alois Blank** died at his residence in St. Louis, December 5, 1905, at the age of fifty-seven years. Dr. Blank was a graduate of the Medical Department of Washington University and was interested in a drug business on South Broadway. He was a public spirited and popular citizen. He was a brother of Dr. Charles F. Blank, also a graduate of the same medical college and a graduate of the St. Louis College of Pharmacy, who is now practicing medicine.

**Professor Julian Reverchon,** whose death occurred at his home in Dallas, Tex., last December, was a brother of two European botanists. They are N. E. and E. Reverchon. The deceased came to this country in 1855 and settled with his father in Texas. He remembered Dallas as a village of less than 400 inhabitants. It was through his studies that the botany of Texas became known to the world. He was one of the most distinguished botanists of the country and had a private collection of more than 20,000 specimens.

**Dr. Herman Behrens,** of Waco, Tex., whose recent death was recorded in the MEYER BROTHERS DRUGGIST for January, was born in Germany, February 20, 1852. He came to this country when a mere boy, his parents locating at Memphis, where the family remained several years. In 1874, he removed to Paris, Tex., and engaged in the drug business. In 1878, he moved to Waco which remained his home until the time of his death. The first firm was known as Behrens & Moser. After a few years the firm sold out, and Dr. Behrens, after a trip to Germany, organized the wholesale firm of Behrens & Castles. In 1891, the firm became known as the Behrens Drug Co., Dr. Behrens was elected president and held this position until the time of his death.

Dr. Behrens was a public spirited man, being interested in many enterprises and in work of a charitable and fraternal nature. He was a Mason, a Knight of Pythias and an Elk, having passed the chairs in all of these organizations. He was at all times very unassuming and this, with his other admirable qualities made him extremely popular. He was married in Germany in 1874, and his widow survives him. The only child is Mrs. Dr. Charles Bruhl, of Houston.

## A. Ph. A.

### Atlantic City A. Ph. A. Snap Shot.

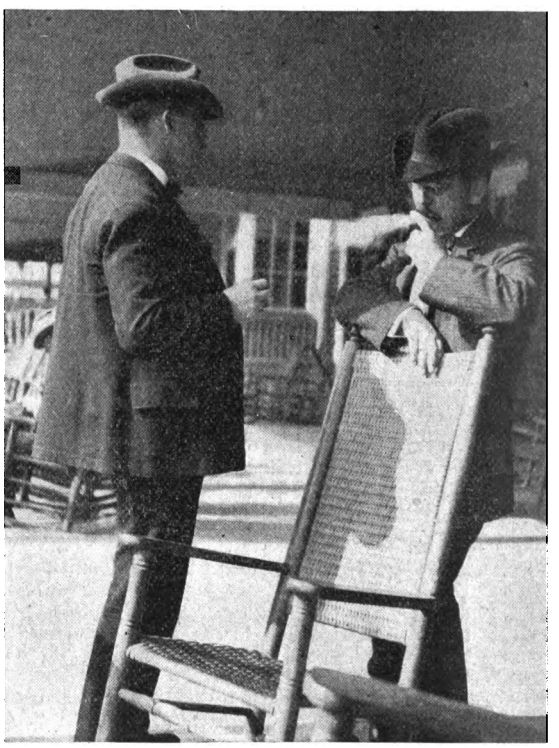

Photo by the Meyer Brothers Druggist.

Professor Charles E. Caspari, chemist for the Meyer Brothers Drug Co., and Professor W. A. Puckner, chemist for the Searle & Hereth Co., discussing the practical application of what they respectively teach in the St. Louis College of Pharmacy and in the Pharmacy Department of the University of Illinois.

**A. Ph. A. Affairs at Indianapolis.**—The local committee, under the guidance of Chairman Frank H. Carter, is active, even at this early date, in preparation for the annual meeting, which occurs the week beginning September 4. Sub-committees on finance, history and entertainment have mapped out their work. The chairmen of the various committees, as published in the MEYER BROTHERS DRUGGIST, have formally accepted their appointments. We are informed that the local pharmacists are enthusiastic and the right hand of fellowship is even now reaching out towards visitors. A special effort will be made to increase the A. Ph. A. membership in Indiana.

# EDITOR'S TABLE.

**Neb. Bd. Ph.** Nineteenth Annual Report. W. W. Kendall, Superior, secretary.

**N. C. Ph. A.** Proceedings of the 1905 Meeting. P. W. Vaughan, Durham, secretary.

**Mass. Ph. A.** Proceedings of the 1905 Meeting. James F. Guerin, Worcester, secretary.

**The Miss. Ph. A.** is a young organization. The Third Annual Report is just at hand with the compliments of the secretary, O. W. Bethea, who is also secretary and treasurer of the Hopkins & Bethea, wholesale druggists, of Meridian, Miss.

**Coloring Matter for Food Stuffs and Methods for their Detection,** is the title of Circular No. 25, of the Bureau of Chemistry of the Department of Agriculture. A copy can be obtained by addressing the Bureau at Washington, D. C. The circular should interest every one in any way associated with pharmaceutical work.

**Man and His Poisons,** a Practical Exposition of the Causes, Symptoms and Treatment of Self-Poisoning, by Albert Abrams, A. M., M. D. (Heidelberg), F. R. M. S., Consulting Physician Denver National Hospital for Consumptives, The Mount Zion and the French Hospitals, San Francisco; President of the Emanuel Sisterhood Polyclinic; formerly Professor of Pathology and Director of the Medical Clinic, Cooper Medical College, San Francisco. Illustrated. Price, $1 50. New York: E. B. Treat & Co., 241-243 West Twenty-Third Street, 1906.

This volume presents to the thinking reader a subject of great interest. A few years ago, self-poisoning was looked upon as a fascinating, if not a plausible theory. Evidences have more recently shown that the theory must be looked upon as a scientific fact. The author is a fascinating writer and handles the subject in a way which will attract the attention of even those who are not medical men.

**A Simple Course of Laboratory Practice in Applied Pharmacy,** by George Beecher Kauffman, B. Sc., Pharm. D., James Hartley Beal, D. Sc., Pharm. D., Julius Arnold Koch, Ph. D., Pharm. D. Copyright 1905. Columbus, Ohio: The Midland Publishing Co.

We are informed that this very convenient volume is intended only for the students taught by the authors. We surmise, however, that it will fit into the work of other institutions and prove of service in a wider sphere than anticipated.

The substantially bound volume is supplied with alternate blank pages for the convenience of students in making their own notes. The subject matter includes the following topics under six separate headings: Physical Measurements, Galenical Preparations, Preparation and Purification of Chemicals, Prescription Practice, Volumetric Analysis, Pharmaceutical Assaying.

**Culbreth's Materia Medica.**—A Manual of Materia Medica and Pharmacology for Students and Practitioners of Medicine and Pharmacy. Comprising all Organic and Inorganic Drugs which are and have been official in the United States Pharmacopœia, together with important Allied Species and Useful Synthetics. By David M. R. Culbreth, Ph. G., M. D., Professor of Botany, Materia Medica and Pharmacology in the University of Maryland, Departments of Medicine, Pharmacy and Dentistry. Fourth edition. Revised to accord with the new U. S. Pharmacopœia, Eighth Decennial Revision. Octavo, 976 pages, 487 illustrations. Cloth, $4.75, net. Philadelphia and New York; Lea Brothers & Co., Publishers, 1906.

The new edition is revised in fact as well as in name. It has been brought into accord with the revised Pharmacopœia, and the author has also kept in mind recent advances in the Department of Medical Science to which his work is devoted. Particular attention has been given to posology. In fact Dr. Culbreth is a man who looks carefully after even the most minute details of any undertaking which he assumes.

For more than twenty years, the author conducted a prosperous retail drug business and he bears this experience in mind while preparing information for those still engaged in that calling and for young men and women preparing to enter pharmacy.

The volume opens with a general discussion of materia medica and the physiological action of drugs, taking up the forms in which medicine may be used, the avenues through which they enter the human system, the means by which they are transmitted through and eliminated from the system and conditions which may modify their action and doses. Then follows a clear statement of classifications, alphabetical, chemical, morphological, anatomical, botanical, therapeutical, etc. The greater part of the volume is taken up with a clear comprehensive covering of organic drugs from the vegetable kingdom; organic drugs from the animal kingdom; inorganic drugs from the mineral kingdom; organic carbon compounds and synthetics including both official and non-official. A section is devoted to the study of the microscope and its practical uses in materia medica and the volume closes with an appendix of great usefulness covering poisons and antidotes, prescription writing, tables of weights, measures, doses, abbreviations, pronunciations, etc. An unusually full index renders instant reference to any subject easy and completes a work which stands without an equal in its field for practical value and authoritative statements.

**The Practice of Pharmacy,** a Treatise on the Modes of Making and Dispensing Official, Unofficial and Extemporaneous Preparations, with Descriptions of Medicinal Substances, Their Properties, Uses and Doses, Intended as a Hand-Book for Pharmacists and Physicians and a Text-Book for Students. Fourth Edition. By Joseph P. Remington, Ph. M., Phar. D., F. C. S., Chairman of the Committee of Revision of the Pharmacopœia of the United States of America, Professor of Theory and Practice of Pharmacy and Director of the Pharmaceutical Laboratory in the Philadelphia College of Pharmacy, Pharmaceutical Editor of the United States Dispensatory, Honorary Member of the Pharmaceutical Society of Great Britain, etc. With over eight hundred illustrations. Philadelphia: J. B. Lippincott Co. London: 5 Henrietta Street, Covent Gardens. Price, cloth, $5.00; leather, $6 50.

The recent revision of the Pharmacopœia necessitates new revisions of all commentaries upon that authority. Remington's Practice of Pharmacy is among the very first to follow the Eighth Decennial Revision of the U. S. P.

The first edition of The Practice of Pharmacy appeared in October, 1885, so that more than twenty

Digitized by Google

years have passed since the work first made a bid for popular favor. The fourth edition, like each of its predecessors, is thoroughly revised. This indicates the determination of the author to keep the work thoroughly abreast with the times.

The Committee on Revision of the Pharmacopœia and the authors of the various commentaries have a constant fight with space occupying matter which seems absolutely necessary in the respective works. Prof. Remington has endeavored to keep the size of his Practice of Pharmacy down to the minimum, but the nature of the work has made it necessary to permit of a constant growth. As a consequence, the fourth edition contains just 1504 pages of the body plus XXV. of titles, contents, list of illustrations, etc. It causes the book to assume the proportions of a dispensatory of less than a generation ago. It is not unwieldy as a reference work, but it has reached the limit in size for a text-book. In the effort to save space, many of the old illustrations have been reduced in size. As a rule, this has been done without in any way detracting from the value of the work. Some of the prescriptions, however, should have been enlarged, in order to make possible the reading without the use of a microscope. Over one hundred new and useful illustrations have been introduced. The author makes acknowledgement to his son, J. Percy Remington, for the work of preparing the illustrations in the fourth edition.

The increased importance attached to Pharmacopœial matters has made it advisable to adopt a new means of distinguishing official requirements from the comments on official articles. The U. S. P. descriptions now appear in small black type.

Strange to say, English pharmacists are without adequate commentaries upon their Pharmacopœia, nor do they have text-books on the practice of pharmacy which compare favorably with the dispensatories and pharmacies of the United States. Remington's Practice of Pharmacy has met with so much favor among English pharmacists that the author decided to introduce the British Pharmacopœial substances when they differ from those of the U. S. P. Of course, the work is not confined to substances official in either of these Pharmacopœias, but contains a number of medicines previously official and still in use.

The author recognizes the metric system for its convenience and for the fact that it is official, but he also continues the old form quantities for the convenience of those who do not work with the metric weights and measures.

Part V. of the new edition is one which will appeal strongly to those preparing for board of pharmacy examinations. This enables such persons to review the whole subject usually considered in board examinations. The chapter on arithmetical problems, by Charles H. LaWall, is also intended particularly for students.

The National Formulary is reprinted under the chapter "Formulary of Unofficial Preparations." The quantities are expressed in metric as well as old form weights and measures.

# NEWS FROM HERE AND THERE.

**Deaths From Wood Alcohol** continue. When will the public learn that this substance is poison, and that taking it as a beverage means certain death?

**Six Months Jail Service** is the result of a sentence against a witness in Philadelphia who refused to give testimony in the trial of the druggist from whom he had purchased cocaine.

The Red Cross Drug Store, of Cairo, Ill., is owned by W. F. Simon.

Black & Little is a firm with a large and growing drug business at Honey Grove, Tex.

J. H. Power is a pharmacist with a large and growing drug trade at Cincinnati, Ia.

M. B. Ford, formerly of Blackwell, Okla., is now with the Viola Drug Co., of Viola, Kans,

L. Wayne Coleman, Sylvia Kan., starts the new year as a careful reader of the pharmaceutical press.

Paul Hanisch is a chemist and druggist at Fredericksburg, Tex., who gives special attention to prescription work.

R. L. Hope, ex-president of the Mo. Ph. A. and a prominent business man of the state, visited St. Louis recently.

S. M. Weirather succeeds Dr. Bradway & Son, Abingdon, Ill., in the drug business. Possession given January 1, 1906.

Millard B. Holly, Ph. G., has disposed of his store at Jasper, Ind., and will locate in either Iowa or Oklahoma Territory.

Dr. Thomas L. Irwin and Mr. Fred Preismeyer, both of Moberly, Mo., were among the welcome visitors in St. Louis, this month.

J. W. Powers, of Pacific, is one of the long established Missouri pharmacists. He is popular with his trade and very conscientious in his work.

The Rector Drug Store, Nashville, Ark., was visited by burglars, January 21. A small amount of cash and a selection of jewelry were missing the next morning.

M. F. Loos, a pharmacist of St. James, now in his sixty-seventh year has decided to retire from the drug business when he can satisfactorily dispose of his store.

Charles M. Carr, editor of the *N. A. R. D. Notes*, has been elected treasurer of the Chicago Trade Press Association. This is the largest organization of the kind in the world. Mr. Carr was vice-president last year.

Norman A. Kuhn, of the Kuhn Mercantile Co., Las Vegas, N. M., is as prosperous in real estate as he was in the drug business when located at Omaha. His many friends are pleased to learn of his continued success.

**Drinking Drug Clerks are Scarce,** at least in the store of Albert E. Ebert, of Chicago, who, after an experience of nearly fifty years, has had but one clerk addicted to the drinking of alcoholic beverages.

# THERAPEUTICS FOR PHARMACISTS.

**The U. S. P. Pills From a Medical Standpoint.**—In our September issue we published a review of the revised Pharmacopœia from the standpoint of a physician. Below we give comments upon the official pills, this article being copied from the *St. Louis Courier of Medicine:*

Fourteen Pills are Official in the Eighth Revision, a number sufficiently large to supply the needs of common practice. Three pills were dismissed by this revision; namely: pilula aloes et asafœtidæ, pilula antimonii composita and pilula rhei. To us the dismissal of the first of these pills seems a loss, since its value in certain intestinal indigestions can not be questioned.

Among the Articles Added to the Pharmacopœia are two pills, namely: pilulæ laxativæ compositæ and pil. podophylli, belladonnæ et capsici. The former evidently are intended to replace the many forms of aloin and belladonna pills on the market. Each pill contains the following ingredients: Aloin, $\frac{1}{3}$ grain; strychnin, $\frac{1}{30}$ grain; extract of belladonna, $\frac{1}{8}$ grain; ipecac, $\frac{1}{16}$ grain; glycyrrhizæ, $\frac{1}{2}$ grain. This pill has by usage received the sanction of physicians generally as a potent remedy in chronic constipation. The other new official pill is pil. podophylli, belladonnæ and capsicum, which contains $\frac{1}{4}$ grain of the resin of podophyllum, $\frac{1}{8}$ grain of belladonna and $\frac{1}{2}$ grain of capsicum.

This is an excellent form in which podophyllum and capsicum may be given. For a general review of the physiological action of podophyllum we refer to the following leading article.

The aloes pills, and the pills of aloes and iron, should more generally be prescribed especially the latter in anemia with constipation. In regard to the pills of aloes and mastic, the so-called Lady Webster pills, it may be stated that they are no longer popular in the West. Each pill contains 2 grains of aloes and $\frac{1}{2}$ grain of mastic. Perhaps some of us have forgotten the therapeutic value of the mastic but have heard that it is used as a temporary filling for decayed teeth. If it ever had a definite therapeutic action it has been forgotten and its use now seems merely as an excipient. Then why have we two kinds of aloes pills? The ordinary pills of aloes with soap as an excipient from a medicinal standpoint are just as active. It must have been an advertising agent who gave the Lady Webster's pills a special potency. The pills of aloes and myrrh offer a combination more valuable, since, besides 2 grains of aloes, it contains 1 grain of myrrh and $\frac{1}{2}$ grain of aromatic powder. Myrrh, in addition to its stimulating effect on the alimentary tract has a stimulating effect on the leukocytes—according to Binz induces a marked leukocytosis. This pill might therefore be of special value in certain infectious diseases in which a purgative is indicated. Other official purgative pills are the compound cathartic pills and the vegetable cathartic pills, the former containing about 1 grain of calomel in each pill, and the latter has $\frac{1}{4}$ grain each of the extract of leptandrin and the resin of podophyllum. These purgative pills are perfectly sufficient when a brisk purgative is desired. Another laxative pill is the compound pill of rhubarb which contains rhubarb, 1 grain; aloes, $\frac{1}{4}$ grain; myrrh, $\frac{1}{2}$ grain with oil of peppermint. This is an elegant pill to be used in various indigestions and fermentive conditions of the intestinal contents.

The pills of asafœtida, the pills of opium and the pills of phosphorus explain themselves. Two pills of iron are official: Pills of ferrous carbonate (Blaud's pills) and pills of ferrous iodid.

It is obvious that the Pharmacopœia provides us a variety of laxative and purgative pills and it is scarcely necessary for the physician to seek other combinations.

## STRAY ITEMS AND COMMENTS.

**"The Slaughter of the Ignorants,"** is the way a subscriber suggests that reference should have been made in a note on page 12 of the January MEYER BROTHERS DRUGGIST, in place of referring to the "Slaughter of the Innocents," as was done by one of our exchanges.

**The Metric System and the Daily Press.**—It is pleasing to note the favorable comments which the daily press now makes on the metric system. The influence of public opinion is being carefully wielded in favor of the bills now before Congress. This is in great contrast to the rather sickly humor which the press exhibited on previous occasions in its attempt to make fun of the metric system.

**Revised U. S. P. Doses.**—Dr. E. H. Bartley, an active A. Ph. A. member, contributes to the *Brooklyn Medical Journal* a list of some of the active U. S. P. preparations which have been changed in strength by the committee revising with authority. The following examples show the doses according to previous and also according to Eighth Revision of the U. S. P.:

| | Old Dose Minims. | New Dose Minims. |
|---|---|---|
| Tincture Aconite | 8 | 10 |
| Tincture Belladonna Flor | 5 | 8 |
| Tincture Veratrum Viride | 8 to 10 | 15 |
| Tincture Hydrastis Can | 30 | 60 |
| Tincture Lobelia: | | |
| Expt | 8 | 15 |
| Emetic | 30 | 60 |
| Tincture Cannabis Ind | 6 | 10 |
| Tincture Colchicum Seed | 20 | 30 |
| Tincture Digitalis | 10 | 15 |
| Tincture Gelsemium | 5 | 8 |
| Tincture Hyoscyamus | 25 | 15 |
| Tincture Physostigma | 10 | 15 |
| Tincture Sanguinaria | 10 | 15 |
| Tincture Squill | 10 | 15 |
| Tincture Stramonium | 5 | 8 |
| Tincture Kino | 30 | 60 |
| Tincture Benzoin Comp | 24 | 30 |
| Wine of Colchicum Seed | 20 | 30 |
| Syrup of Iodide of Iron | 15 | 30 |
| Tincture Nux Vomica | 6 | 10 |

# MISSOURI DEPARTMENT.

**The Mo. Bd. of Ph.** met at Kansas City, January 8, 1906. Out of fifty-six examined, the following nineteen passed:

H. A. Barber, St. Louis; Eldo R. Fox, Higbee; Joseph Fabra, St. Louis; Sam L. Grother, Cole Camp; E. M. Loakman, Farmington; William J. Easley, St. Louis; L. Earl Morson, Springfield; J. H. Keehan, Kirksville; Charles Norford, St. Louis; Paul J. Mason, Kansas City; J. L. Palmer, St. Louis; Charles R. Spahr, Boonville; Robert B. Southworth, St. Louis; Glazier Williams, Kansas City; Bernard M. Warner, St. Louis; D. B. Van Huffle, Wentzville; Ralph P. Wolfe, St. Louis; George K. White, St. Louis.

S. L. GROTHER.

The board is issuing a circular to circuit judges and prosecuting attorneys calling their attention to complaints regarding unregistered druggists.

The Next Meeting will be at Pertle Springs (Warrensburg), Monday, June 11, 1906.

**Mo. Bd. of Ph. Examination** (January 8, 1906).—1. Define the term element. Name ten elements you consider most important in pharmacy and name two compounds of each.

2. What instruments are applied to measure temperature? Give their divisions. Which is the most rational and should be used exclusively?

3. The standard of the metric system is the meter; what is it? What is a liter? A gramme? What relation have they to the meter?

4. An officinal preparation of the new Pharmacopœia directs: Gran. ferrous sulphate, 16.0; pot. carb., 8.0; sugar, 4.0; Althea, No. 60, powd., 1.0; glycerin, water, each q. s. to make 100 pills. Give name and working process.

5. Name nine important articles added to the new Pharmacopœia.

6. Give ingredients of elix. ferri, quininæ et strych. phosphatum and process for making.

7. Give average dose of the following: (a) Scopola; (b) Aconitina; (c) Guaiacol; (d) Acetphenetidinum; (e) Pot. iodide; (f) Calomel; (g) Aloin; (h) Elaterin; (i) Ergot.

8. What are suppositories? Give usual base. What variety in shape is used? Give formula for glycerin suppository.

9. Mention five organic and five inorganic acids.

10. What is a saturated solution? Give strength of sat. sol. pot. iodide; of sat. sol. boric acid; of potass. chlorate.

11. What is source of sodium salts? How is sal soda made?

12. What is (a) Acrid; (b) Emollient; (c) Demulcent; (d) Cardiac; (e) Escharotic; (f) Odomtalgic; (g) Errhine; (h) Nasal; (i) Styptic?

13. What are alkaloids? Name six and give properties.

14. Give antidote for (a) Arsenic; (b) Morphine; (c) Strychnine.

15. Calomel, 2 grs.; bicarb. soda, 4 grs.; Dover's powd., 10 grs.; quinine, 30 grs. Make 10 caps. Rewrite in Latin and give metric system.

Identification.—Each applicant was also given five drugs, five chemicals and five galenicals to identify and answer such questions as dose, source, etc.

## STRAY ITEMS AND COMMENTS.

**No One Watches Congress With Greater Interest** than the patent medicine manufacturer. The popular public agitation against this class of goods is likely to be reflected in the capitol at Washington, during the present session of the lawmakers.

**Luther F. Stevens,** who recently died at his home in Brooklyn, N. Y., removes another one of the old time and old school pharmacists. He belonged to that class represented in Missouri and the Middle West by F. W. Sennewald and H. E. Hoelke, of St. Louis.

**The California University** Department of Pharmacy has an active alumni association. Regular meetings are held, and the following are some of the subjects to be presented during the series thus far planned:

"Some Advantages of the New U. S. Pharmacopœia," by Joseph H. Guedet, Ph. G.; discussion opened by Chas J. Abraham, Ph. G.

"The Pharmacist in the U. S. Navy," by J. J. O'Grady, Ph. G., ex-U. S. N.; discussion opened by Earl N. Greenwood, Ph. G., ex-U. S. N.

"The Non-Metallic and Metallic Minerals of the Pacific Slope in Relation to the Manufacture of Salts of Pharmaceutical and Technical Interest," by Professor Frank T. Green and F. W. Nish, Ph. G.; discussion opened by Professor W. M. Searby.

**Ask Your Physician** to specify U. S. P. when he desires to prescribe or recommend the following preparations. Dr. E. H. Bartley, in the *Brooklyn Medical Journal* makes this recommendation and gives the following list:

Wine of Coca.
Hamamelis Water.
Liquor Antisepticus.
Cataplasm of Kaolin.
Emulsion of Turpentine.
Emulsion of Cod Liver Oil.
Compound Solution of Cresol.
Solution of Sodium Phosphate.
Extract of Malt (Thick Syrup).
Compound Acetanilide Powder.
Effervescent Magnesium Sulphate.
Compound Syrup of Hypophosphites.
Dilute Hydriodic Acid (Aqueous Solution).
Aromatic Fluidextract of Cascara Sagrada.
Pills of Podophyllum, Belladonna and Capsicum.
Emulsion of Cod Liver Oil with Hypophosphites.
Elixir Iron, Quinine and Strychnine Phosphates.
Syrup of Iron, Quinine and Strychnine Phosphates.
Glycerite of Iron, Quinine and Strychnine Phosphates.
Compound Laxative Pill (Aloin, Strychnine, Belladonna and Ipecac).

Digitized by Google

# THE MARKET REVIEW.

The First Month of the New Year has shown a revival of business from the lassitude that obtained before and during the holidays.

The market in the drug line has been very active, some sensational price changes have taken place, chief among which are advances on Camphor, Arsenic, Tannin; declines on Alcohol, Quinine Iodine, Iodoform, Iodide Potassium, and the other Iodides; Vanillin, Opium and Rock Candy Syrup. We append below the principal items, the changes and present ruling prices:

**Advanced.**

Acetanilide,
Acid, Oxalic,
Arsenic,
Amyl Acetate,
Bark, Sassafras,
Blue Vitriol,
Camphor,
Chalk, Crayons,
Leaves, Bay,
Oil, Benne,
Cumin,
Lemon,
Linseed,
Paint, Mixed,
Paint Brushes,
Root, Bamboo Brier,
Blue Flag,
Ginger, African,
Lovage,
Squill,
Rosin,
Seed, Blue Poppy,
Shellacs,
Tannin,
Window Glass.

**Declined.**

Acid, Tartaric,
Alcohol,
Anise, Star,
Beans, Vanilla, Bourbon,
Cloves,
Corrosive Sublimate,
Cream Tartar,
Iodides,
Marjoram,
Oil, Pimento,
Sperm,
Opium,
Quinine,
Rock Candy,
Rock Candy, Syrup,
Root, Sarsaparilla, Mex.,
Senega,
Unicorn, False,
Saffron, Spanish,
Seed, Rape, German and
English,
Celery,
Sunflower,
Turpentine,
Vanillin,
Wax, Japan.

**Quinine.**—A break of two cents, January 15, was not unexpected, due to the weakness of the price on Cinchona Bark, which has been offered in increased quantities. The situation at this writing, however, is stronger, domestic manufacturers have naturally had heavy demands, and are restricting their commitments with the jobbing trade, and we rather look for a reaction. Present quotations in this market without obligation: bulk on the basis of 100-oz. cans, P. & W., 18c; M. B., 17c; 5-oz. cans, 24c, 1-oz. vials, 29c.

**Opium.**—Declined, due to lack of demand; quotable $3.30 to $3.45; powdered, $4.05 to $4.35.

**Morphine.**—Unchanged; quotable in ⅛s at $2.55 to $2.60; 1-oz. vials, 25c per oz. less.

**Alcohol.** — Quotably lower; at a decline since our last issue of 2c; bbls., $2.60; ½ bls., $2.63; 10-gal. cans, $2.76; 5-gal. cans, $2.83; containers inclusive, with the usual allowance of 8c per gallon for cash in ten days.

*Wood.*—Remains steady and unchanged; barrels, 70c; ½ barrels, 80c; 10-gal. cans, 88c; 5-gal. cans, 95c; containers inclusive.

**Acetanilide.**—Advanced to 27 to 32c in bulk; 1-lb. cartons 2c higher. These prices may be shaded in large lots for immediate shipment or on contract.

**Acid,** *Oxalic.*—Advanced; quotable in bbls. at 6½ to 10 to 13c as wanted; powdered, 9½ to 15 to 19c as to quantity.

*Tartaric.*—Declined; quotable in bbls. at 29½ to 34 to 37c in a small way.

**Amyl Acetate,** *Commercial.*—Advanced 30c per gal.; quotable at $1.80 to $2.00 and 30 to 40c per lb. in a small way.

**Arsenic.**—Materially higher. The growing scarcity of this article has attracted a great deal of attention. Supplies have been curtailed by reason of the mines in France, Wales and elsewhere having been flooded, and the probability that they will not be re-opened at least for some time to come, makes higher prices entirely within the range of probability.

The white, powdered, in 400-lb. kegs, is offered at the present writing in this market at 8 to 12 to 15c in small lots.

**Bark,** *Sassafras.*—Advanced; re-sifted at 16 to 19 to 21c as wanted.

**Beans,** *Vanilla.* Bourbon.—Declined; 6 in., $3.75; 6½ in., $4.00; 7 in., $4.50; 7½ in., $4.75; 8 in., $5.75; 8½ in., $6.25.

**Camphor.**—Owing to the great decrease in the volume of imports and consequent scarcity, this staple has had some very material advances, and present offerings in this market for the bulk, in bbl. lots, 96c to $1.00 to $1.05 as wanted; 1-lb. boxes, 1-oz. cakes, $1.05 to $1.10 as wanted.

**Cloves.**—Declined; quotable in bales at 15½ to 19 to 22c in a small way.

**Corrosive Sublimate,** *Powdered, Crystals* and *Granular.*—Declined to 78 to 90c as to quantity.

**Cream Tartar.**—Declined to 25½ to 28 to 31c as to quantity.

**Iodine,** *Re-sublimed.*—A sensational decline due to the manipulation of English holders is noted; quotable in a small way, 1lbs., $3.33; ½ 1lbs., $3.47; ¼ lbs., $3.66. In sympathy with this movement the following items are quotably lower:

**Iodoform.**—Pound bottles, $3.83; in ½s, $3.92; in ¼s, $4.05; ozs., 35c.

**Potassium Iodide.**—The bulk in 5-lb. lots, quotable at $2.45; 5-lb. boxes, $2.46; 1-lb. boxes, $2.52; the other iodides are relatively lower.

**Leaves,** *Bay.*—Advanced to 10 to 12c as to quantity.

**Marjoram,** *Sweet.*—Declined to 15 to 22c as to quantity.

**Oils, Heavy,** *Benne.*—Advanced; bbls., 70 to 85c to $1.00 in smaller lots.

*Linseed.*—We note a net advance of 4c since our last issue, though present prices are ruling 3c under those ten days ago. Quotable at this writing, raw, bbls., 40c; boiled, 41c.

*Neatsfoot,* Extra.—Advanced; bbls., 56 to 69 to 75c; No. 1, bbls., 46 to 59 to 68c.

*Sperm.*—Declined; bbls., 72 to 92 to 95c in a small way.

Digitized by Google

**Oils, Essential,** *Cumin.*—Advanced to $5.00 per lb.; 50c per oz.

*Lemon,* M. B. Reina.—1-lb. coppers, 93c; Sanderson's, $1.35.

*Pimento.*—Declined to $2.50 to $3.00.

**Paint Brushes.**—Advanced about 7½ per cent, due to the scarcity of bristles.

**Paint, Mixed.**—Owing to the increased cost of raw material, Diamond Paint, M. B., has advanced on schedule 10c per gal.

**Rock Candy Syrup,** Pure *Diamond Crystal Brand.*—Quotably lower; bbls., 50c; ½ bbls., 52c; 10-gal. kegs, 62c; 5-gal. kegs, 70c.

**Rock Candy.**—Slightly lower; 5-lb. boxes, white, all string, 11c.

**Root,** *Bamboo,* Brier.—Advanced to 17c.

*Blue Flag.*—Advanced to 25c; ground, 27c.

*Ginger,* African.—Advanced; bags, 7 to 10 to 13c in a small way.

*Lovage.*—Advanced to 45c; powdered, 50c.

*Sarsaparilla,* Mexican.—Quotably lower; bales, 12 to 17 to 22c in small lots.

*Senega.*—Declined to 90c; ground, 92c.

*Squill.*—Advanced 20c; sliced, 25c.

*Unicorn,* False.—Declined to 60c; powdered, 65c.

**Saffron,** *Spanish,* Valencia.—Quotably lower; 1-lb. cans, $9.50; ozs., 70c.

**Seed,** *Celery.*—Declined; bags, 9½ to 13 to 15c in a small way.

*Poppy,* Blue.—Advanced; bags, 7½ to 13 to 16c.

*Rape,* English. — Declined; bags, 5⅛ to 9 to 12c; German, declined; bags, 5 to 8 to 10c.

*Sunflower.*—Declined to 7 to 10c.

**Shellacs.**—Quotably higher; V. S. O. in case lots, 62 to 68 to 71c; T. N. case lots, 48 to 53 to 56c; powdered, 56 to 61c; bleached, bbl. lots, 44½ to 50 to 54c.

**Tannin.**—A material advance is noted; quotable in bbls. at 65 to 77 to 87c as to quantity.

**Vanillin.**—Declined to 40 to 60c. These prices may be shaded in large lots.

**Wax,** *Japan.*—Declined to 18 to 24 as to quantity.

**Glassware.**—Continues in a strong position; prices are firmly held. The discounts ruling in this market remain unchanged; high grade prescription ware is jobbing in 5-case lots at 75, 10 and 5%; cases, 75 and 10%; broken case, 70 and 5%; flasks are quotable at 80 and 20%; 10-case lots, 85% discount.

**Window Glass.**—Firmer and quotably higher. The discounts ruling in this market at the present writing for the first and second bracket, single strength, A or B, 16x20 excepted, 90 and 30%; 16x20, 90 and 10%; all single above second bracket and all double 90 and 20%.

**Turpentine.**—Declined since our last issue; quotable in bbls. at 71½c; ½ bbls., 75½c; 10-gal. cans, 79½c; 5-gal. cans, 84c; packages incl.

---

**To Remove Rust from Iron Spatulas.**—Procure a piece of hard wood—*e. g.*. oak—dip it in oil and then in emery powder, and rub this well on the steel. Then polish in the usual way.—[*Chemist and Druggist.*

# ST. LOUIS LOCALS.

**August L. Claes,** who died recently at his home in St. Louis, was the pioneer show-case manufacturer of this city. His son, August F. Claes, is executrix of his estate.

The Victor Pharmacy, at 3459 Chippewa Street, looks carefully after the wants of the citizens of that section of St. Louis.

The Death Record in St. Louis shows a decrease for 1905, the number of deaths for that year being 10,325 against 11,506 in 1904.

The St. Louis Chemical Society had a very pleasant and well attended smoker at Lippe's Restaurant, the evening of Saturday, January 20.

The Missouri Press Association will hold its mid-winter meeting in St. Louis, February 8 and 9. Headquarters will be at the Laclede Hotel.

J. A. Fritz, Ph. G., is one of the prosperous pharmacists of North St. Louis, whose store is located at Twenty-second and Benton Streets.

The Credit Guide, intended to give druggists, dentists and doctors a list of St. Louis dead beats, is looked forward to with considerable interest by many of the St. Louis pharmacists.

Jacob E. Scheu enters upon his second year as proprietor of the store at 4395 Laclede Avenue. He is doing a prosperous business, and his many friends extend congratulations for his continued prosperity in the new year.

The St. Louis Public Library contains about 190,000 bound volumes. The library was forty years old December 9, 1905. It was formerly necessary to pay for the library privileges, but it is now absolutely free to the citizens of St. Louis.

Henry F. Bader will be his own successor as postmaster of East St. Louis. Such is the decision of the senate, and the appointment is in accord with the president's rule to continue exceptionally good postmasters in office. Mr. Bader is a pharmacist as well as a postmaster. He is also a very successful business man.

HENRY F. BADER

**Indecent Medical Advertising** would be a thing of the past in St. Louis newspapers if the St. Louis Medical Society could accomplish all that it has undertaken. The society has employed special counsel and brought suit against a number of St. Louis parties violating a city ordinance prohibiting such advertising. A test case has been decided in favor of the society, which no doubt will be appealed by the defendants and an effort made to wear out the enthusiasm of the society.

E. E. Cornelius, D. R. Bradley & Son, Detroit, Mich.
G. E. Snedder, American Chicle Co., Cleveland, O.
C. E. Foote, Foote & Jenks, Jackson, Mich.
D. E. Wilcox, The Thermalite Co., 78 Dexter Building, 84 Adams Street, Chicago, Ill.

G. T. Mankin & Co. is a prosperous firm of manufacturing and dispensing druggists at Falls Church, Va.

Hugh Marshall, the popular druggist of Monmouth, Ill., is again able to be at his store after a six week's siege of scarlet fever.

Mr. W. A. Beauchamp, formerly proprietor of the Nashville Drug Co., Nashville, Ark., is now manager of Plunkett-Jarrell Grocer Co's. branch house.

W. S. Kinnison is a prescription druggist of St. Joseph, Mo. He has two stores, one at Fourth and Edmond Streets and the other at Seventh and Edmond Streets.

C. S. Corey, the East end druggist of Fort Dodge, Ia., has been confined to his home by sickness for the past four weeks and not able to be out at this writing.

George B. Welborn is a druggist of Woodlawn who has few resolutions for the new year on account of the careful manner in which he looked after affairs in 1905.

C. Weschcke is proprietor of the Corner Drug Store at Springfield, Minn. He starts the new year with an interest in organization work and pharmaceutical journals.

John H. Blakeslee and wife, of Oskaloosa, Ia., are sojourning at Hot Springs, Ark., for a few weeks trying to boil out the rheumatism from which Mrs. B. is a great sufferer.

Rector Drug Store, of Nashville, Ark. will remove headquarters to a good brick building early in the year or as early as a fine set of up-to-date fixtures can be installed in the new building.

A. Wilson Hale, of Hale & Hale, Nashville, Ark., will graduate from the Medical Department of the University of Tennessee next spring. Wilson is a good pharmacist and will, no doubt, do well practising medicine.

Mr. Joel Z. Briggs, formerly at Vinita, I. T., has bought one of Mr. Thomas Shoekle's stores at Tulsa, I. T. Mr. Briggs is a nice, unassuming gentleman, attentive to business, and we bespeak for him a nice patronage.

Edgar C. Marrs succeeds Dr. P. Donnahoe, at Afton, I. T. Mr. Marrs has had charge of the store for several years and is well liked by the general public. He is sober, industrious and truly a noble and moral young man. He was married a short time since and we wish him success.

"McPike's Bi-Monthly," is the name of a new exchange. It is published by the McPike Drug Co., Kansas City. Volume I., No. 1. is dated, December 15, 1905. It is a neat appearing periodical devoting thirty-four pages to reading matter, and 136 pages to advertisements and price lists.

Dr. George M. Gould, 1722 Walnut Street, Philadelphia, will be grateful for any trustworthy information as to the methods which have been devised by the blind in overcoming their disability or in gaining a livelihood. Accounts of such lives, anecdotes, references to literature, etc., will be appreciated.

J. C. Strickling, of Keosanqua, Ia., has recently purchased another two-story brick business building in that town near one of the best corners. The building has two store rooms, one occupied by a drug store and the other by a millinery stock. Second story has the K. P. hall and offices. J. C. is prosperous and believes in investing his money where he made it.

E. P. McCullough did not start with Colgate & Co., 55 John Street, New York City, when that firm began business one hundred years ago. In fact, those who know his sprightly form are slow to believe that he has been with the firm nearly a score of years, but such is the case. It is interesting to know that Colgate & Co. has continued in the same family for the past century. Mr. McCullough promises to remain with them far into the second century of the business. His many friends trust that he will keep his promise.

# NEWS FROM HERE AND THERE.

**An Irish Prescription** is the way a St. Louis pharmacist designates the following:

10 cts worth McNeeshy

**Delay of The Stone Age.**—A number of subscribers have asked me why The Stone Age is not published. This is not a work to be hurried as was Prehistoric Implements. It requires correspondence all over the United States and the study of many collections. It will not be possible to publish the book before March, 1907. No order is binding until the book is issued.

The Stone Age will be in two volumes and will cost $3,000.00. Up to the present time, January 1, 1906, we have $1,930.00 in orders. I cannot afford to give the publishers $1,000.00 guarantee, and therefore shall not print the book until we have enough orders to pay for it.

I have no intention of giving it up, but I think that the prominent collectors who have not subscribed to it should do so. For many years I have given all these men advice and information gratis, and the least that they could do would be to subscribe for the work.—[WARREN K. MOOREHEAD, Andover, Mass.

Robert L. Coley is manager of the Coley Drug Co., at Milan, Tenn.

S. D. Logan & Son are "everybody's druggists" of Gainesville, Mo.

W. N. Kelsey has changed his address from Lenexa to Linwood, Kan.

D. W. Young, formerly of Hot Springs, Ark., is now located at Mobile, Ala.

S. E. Ayres & Son is an enterprising firm of pharmacists at Cedar Rapids, Ia.

Dr. R. H. Dyke, of Bellflower, Mo., is a physician who is also interested in pharmacy.

Max Menzel is a German apothecary with a thoroughly up-to-date drug business at Pipestone, Minn.

Professor H. L. Wright, of Chicago, has returned to Dallas, Tex., where he will remain for the present.

J. V. Deines & Co. is a firm dealing in books, stationery, drugs, paints, oils and wall paper at Fairfield, Neb.

J. R. Brown is a druggist doing a prosperous business in medicines, paints, oils, toilet goods, etc., at Farber, Mo.

R. P. M. Rozieue, with Ben L. Bear, Phoenix, Ariz., continues his active interest in the A. Ph. A. and general pharmaceutical affairs.

J. R. Brown, formerly of Farber, Mo., is a druggist doing a prosperous business in medicines, paints, oils, toilet goods, etc., at Ladonia, Mo.

Charles Stevenson, of the firm of Robert Stevenson & Co., Chicago, Ill., announces that he will now devote his entire time and attention to the firm. He has disposed of his outside interests.

August Schrader is proprietor of the Canton Pharmacy, corner Elliott and Curley Streets, Baltimore, Md.

E. R. Fox has recently registered by authority of the Missouri Board of Pharmacy and has a pleasant position with Cleeton & Cleeton, at Higbee, Mo.

Williams' Drug Store, at Carrollton, Mo., is owned by Frank P. Robinson, who appreciates the new Pharmacopœia and looks carefully after his business.

Luman F. Collins is pleasantly situated with Brokaw & McKnight, at Hiawatha, Kans. He watches the pharmaceutical news as it appears in the various periodicals.

W. C. McPike, president of the McPike Drug Co., of Kansas City, was one of the prominent callers on the drug trade in St. Louis recently. Mr. McPike speaks enthusiastically regarding the prospects for trade the coming spring.

Enjoying the Italian Shores is Mr. Frederick Stearns, founder of Frederick Stearns & Co., of Detroit, Mich. He will spend the remainder of the winter in that beautiful country which he is now visiting for the fifty-third time.

"The Optical Instrument Monthly," of New York City, has been discontinued as such. The former publisher, E. B. Buffet, will now edit the Scientific Instrument Department of *The Optical Journal* which, in a way, will be a continuation of his previous publication.

The Physicians and the United States Pharmacopoeia, is the title of a series of articles being published by the *Journal of the American Medical Association*. It is gratifying to find so many medical journals, and especially the prominent ones, acquainting their readers with the nature of the Eighth Decennial Revision of the Pharmacopœia.

"Presented to Worshipful Brother A. M. Roehrig, P. M., as token of esteem, January 10, 1906. Klopstock Lodge, 760, A. F. & A. M.," is the inscription on a beautiful and expensive charm presented to A. M. Roehrig, Ph. G., by his lodge, at Stapleton, Staten Island, N. Y. We expect to see the charm at the A. Ph. A. convention next September.

Ebert's Pharmacy, that old land-mark on the corner of State and Polk Streets, Chicago, will soon be something of the past. The store has been rented by the syndicate and Mr. Ebert must move not later than May 1. Just what he will do or where he will go is a matter now under consideration. Mr. Ebert may decide not to continue in the drug business. His record of half a century certainly entitles him to an extended vacation.

J. E. Huber, Ph. G., of Peoria, Ill., is a pharmacist and analytical chemist who gives special attention to chemical work. He announces that he is ready to serve those looking for work in the following lines: Analyses, assays, water analyses, chemical and microscopical urine examinations, microscopical measurements, toxicological investigations, food and milk analyses, general technical analyses, bacteriological examinations.

# ST. LOUIS LOCALS.

**The St. Louis Chemical Society** listened to the following paper, read at the January meeting: "The By-Products of the Packing House," by H. E. Wiedemann.

**Let the User Pay for the Phone.**—Such is the motto of C. W. Koch, secretary of the local association. If you are not convinced that he is right, give him a chance to show you his side of the case.

**The St. Louis Drug Clerks' Society** held a mid-winter ball at the Odeon, which was a purely social and a very enjoyable affair. The attendance was large. The wholesale houses were particularly well represented.

**The Commencement Exercises** of the St. Louis College of Pharmacy will be held at Memorial Hall, the evening of Wednesday, April 25. The banquet will occur the previous evening. A committee of arrangements consisting of Theodore F. Hagenow, L. A. Seitz, Dr. Otto F. Claus, with the dean of the faculty and the chairman of the board of trustees, ex officio members, has been appointed. At the recent board meeting, Prof. J. M. Good reported as a delegate to the conference between representatives of the A. Ph. A., N. A. R. D., N. W. D. A. and the Proprietary Association, at Chicago. He submitted a copy of the proposed law regulating the sale of alcoholic and narcotic medicinal substances.

**St. Louis Visitors.**—F. W. Parker, St. Paul, Minn.; C. A. Swanson, St. Paul, Minn.; Steve Roach, Barnard, Mo., representing A. W. Bear; Thos. J. Conner, Prairie du Rocker, Ia.; B. H. Owen, Clarksville, Tenn., of Owen, & Moore; W. S. Coday, Mansfield, Mo.; J. F. Hocking, Waupaca, Wis.; R. L. Irion, Cleveland, O. T., of Cleveland Drug Co.; J. L. Dalton, Poplar Bluff, Mo.; J. L. Braham, Doe Run, Mo.; W. P. Scroggs, Lenox, Ia.; H. L. Tooley, Purcell, I. T.; J. L. Ferguson, Homer La., Claiborne Drug Co.; V. M. Boggs, New Franklin, Mo.; J. A. Funk, Festus, Mo.; A. N. Waller, Carlyle, Ill.; J. H. Loper, Des Moines, Ia., Loper Drug Co.; W. L. Wingo, Steelville, Mo.; T. C. Brickey, Festus, Mo., Festus Mercantile Co.; R. L. Hope, Centralia, Mo.; W. A. Bostick, Van Buren, Ark.; Fred Priesmeyer and Dr. Thos. L. Irwin, Moberly, Mo.

**The St. Louis R. D. A.** had an interesting meeting in February, but the members were disappointed by the internal revenue collector who was busy and could not keep his appointment to address them. The members had anticipated practical information relative to the new ruling requiring them to pay the internal revenue tax in case they handle certain alcoholic patent medicines.

The telephone question came up for discussion and owing to representation made by a local company the subject was postponed for the present. The members are anxious to have slot machines as soon as possible.

No More Trading Stamps After April 1.—Such was the decision of the society. Some members had recently purchased stamps and pleaded for an extention of the time to the above date. Hereafter no device will be permitted which in any way lessons the profit on the goods sold.

The Next Meeting will be held at the Southern Hotel, at 11 o'clock, Tuesday, March 20.

**The St. Louis Drug Clerks' Society** held its annual

E. H. KURTZ, PH. G.

A. J. BRETSCHER, PH. G.

meeting, January 12, with a large and enthusiastic attendance. Retiring President Albert J. Bretscher presented an interesting annual address, in which he reviewed the work of the past year. The attendance at the meetings has been large, many new members have been added to the list, and the various entertainments, such as the ball, excursions and picnics, have been successful affairs.

C. E. Miller reported as chief of the bureau of information. He showed that many clerks had been given positions through the work of the bureau. He can be reached by phone or letter at the St. Louis office of Parke, Davis & Co. The officers for the ensuing year are as follows:

President, Carl G. Hinrichs; first vice-president, Dr. H. Greensfelder; second vice president, C. G. Muller; secretary, Eugene H. Kurtz; treasurer, G. J. Gibson; chief of Employment Bureau, Chas. E. Miller. Entertainment committee—Albert J. Bretscher, chairman; Adolph H. Grosse, Henry F. Sum, Frank Biesterfeldt, D. P. Wright.

T. M. Griffiths has returned with his family, after several months spent in England. He was impressed with the fact that conditions in the drug trade in that country are not all that could be desired.

T. M. GRIFFITHS

Fred W. Kuhlman was a hard student at college, and is an industrious clerk at 1731 South Tenth Street. He sleeps in the store, and, after his busy day, sleeps well with a clear conscience. The burglar who robbed the safe in the store recently realized how tired Mr. Kuhlman must be, so did not disturb him, but quietly took what he could find in the safe and withdrew.

The Alumni Association annual meeting will occur at the St. Louis College of Pharmacy Building, the evening of Tuesday, February 20.

E. L. Mayer, Ph. G., is now a student in the dental department of Washington University. He is doing some relief work during leisure hours.

## ADVERTISING TERMS.

**If You Do Not Find Your Advertisement, Carefully Observe:**

1. Only subscribers are entitled to free advertisements and these notices must not exceed fifty words in length. 2. All advertisements from non-subscribers must be accompanied by one cent per word; otherwise no attention will be paid to the correspondence. 3. Free advertisements for subscribers are only for requests for positions or clerks, announcements of drug stores for sale, or the desire to purchase a business. 4. A charge of three cents per word will be made for all advertisements not coming under the above specifications. 5. No attention is paid to anonymous communications. 6. Write the advertisement on a separate sheet and on but one side of the paper. 7. To prevent delay, have answers directed to the advertiser's address and not to this office. 8. No letters will be forwarded from this office unless the advertiser sends postage for same. 9. Spell out every word in full; never abbreviate. 10. Copy for advertisements must reach us not later than the 25th of the month.

# TRADE NOTES.

**The Pearl Oval** will satisfy.

**A Pink Envelope** means subscription due.

**A. Ph. A.,** Indianapolis, Ind., September 4, 1906.

**"In Memoriam,"** is the title of an interesting booklet recently issued by the Gillette Safety Razor Co., West First Street, Colton to Granite Streets, Boston, Mass.

**The Murine Eye Remedy Co.,** of Chicago, have had a force of detail men in St. Louis territory. While barber shops have been thoroughly canvassed and Murine samples left, the purpose is not to sell to this class of trade but to create a demand for Murine to be supplied only by pharmacists.

**Now is the Time for Pharmacists** to look up their "soda water supplies." The Star Ice Shaver has been pronounced by thousands of users to be the best. An illustration of this machine appears on page 12, this issue. They are manufactured by D. L. Bates & Brother, Dayton, O., and are carried in stock by Meyer Brothers Drug Co.

**Rippey's Powdered Foamoline** is specially prepared for manufacturers of ice cream, sherbets, water ices, etc. It greatly enriches ice cream, gives it that smooth, pasty appearance. It adds to the bulk and will keep the ice cream firm and solid with less ice and labor than any other article offered for that purpose. No heat or eggs required, you simply mix Rippey's Powdered Foamoline with sugar while dry, add your cream or milk and it is ready for the freezer. It is packed in one pound boxes, never sold in bulk. Include a trial order when you hand in your want list to your jobber. Made by William Rippey, 113 East Second Street, Cincinnati, O.

**The McCaskey Register Plant** in Alliance, O., was organized in 1903, with small capital. Today this firm receive more mail at the Alliance post office than any other firm in Alliance. Its trade extends from ocean to ocean, and from Canada to Mexico. Over one hundred traveling men find employment with this firm. The McCaskey Account Register has become more of a necessity to merchants, wholesale and retail, than the cash register. It eliminates book-keeping except that which the Register performs. This firm manufacture 1000 Registers per month. These are made in seventy-seven different sizes and styles to suit all classes of trade. A postal card to this firm will bring full information as to the price, and what style is best adapted to the drug store trade.

**What Manufacturer Will Follow** the suggestion of Albert E. Ebert and place on the market powdered drugs to be put up in packages of convenient size for use in making a convenient and definite quantity of a tincture? Some firms supply powdered drugs in pound or half pound bottles but the pharmacist who buys such a package has a portion left on his hands after making the usual quantity of the tincture.

## TRADE NOTES.

**N. A. R. D.** meeting, place and date to be decided by the executive committee.

**Green Soap,** free from artificial coloring matter, can be obtained if absolutely pure green olive oil is used in its manufacture. Moller's Green Soap is absolutely pure.

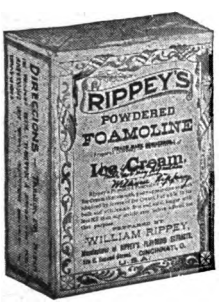
**We Recommend All Dealers** who handle whiskey to place an order for Old Belle of Anderson, bottled in bond. It is an old-fashioned sour-mash, bottled in Woodford County, the heart of the famous blue grass region of Kentucky, under government supervision.

**We Call Our Readers' Attention** to the advertisement of Risley-Bird Mfg. Co., page 15. This firm have made a reduction on their burnt leather post cards from $3.70 to $3.10 cash per 100. This line affords the pharmacist a good margin of profit, and the goods sell themselves when displayed.

**Of Interest to the Housewife.**—In the February *Delineator* there is much of housewifely interest. Isabel Gordon Curtis' helpful household serial called "The Progress of a Housewife" touches upon the kitchen and its utensils. Delicious recipes for onions and cakes and desserts are supplemented by an interesting and instructive article on 'Meat and its Uses," and the pages of Illustrated Cookery are extremely suggestive. Gardening and house furnishing are other topics of particular interest in the home.

# RIPPEY'S
# POWDERED FOAMOLINE

(TRADE MARK REGISTERED)



**Specially Prepared for Manufacturers of ...**

## ICE CREAM, SHERBETS, FRUIT FROSTS and WATER ICES

Rippey's Powdered Foamoline not only enriches your Ice Cream and gives it that smooth, pasty appearance, so much admired by lovers of Ice Cream, but adds to its bulk and will remain firm and solid longer with less ice and less labor than any article ever before offered for that purpose.

**No Heat or Eggs required** you simply mix Rippey's Powdered Foamoline with the sugar while dry, add your cream or milk and it is ready for the Freezer.

For a limited time we will send by mail, postage paid, full half pound on receipt of 25 cents in stamps. Our formulas for ice cream, sherbets, fruit-frosts and water ices mailed free on receipt of your address.

CAUTION:—Rippey's Powdered Foamoline is packed in 1 pound boxes with registered trade mark and signature of William Rippey on every box. Never sold in bulk.

***PRICE, - - 35 cents per pound.***

**One of the Best "Offers" Presented** to the drug trade is that made by the American Pharmacal Co., of Evansville, Ind. This firm offers Dr. Otto's Laxative Quinine Tablets, a guaranteed cure for la grippe, coughs and colds, six dozen boxes for $6.00 and one dozen free; $12.00 for twelve dozen and two and one-half dozen free, with an attractive window display with each order.

This firm also pay freight, giving sixty days, or 2% off cash ten days. This nets over 350% profit.

**"This is to Certify That, on a Knowledge** of the composition of the liquor known as Kudros, made and sold by A. M. Hellman & Co., it is absolutely pure and wholesome."

(Signed) J. FRIEDMAN, M. D.,
Professor Chemistry, Beaumont Medical College,
St. Louis.

"....I earnestly and conscientiously recommend it to take the place of all other stimulating products intended for the sick room; besides representing every advantage possessed by the best preparations of its class, it embodies advantages peculiarly its own; it is, therefore, in a class by itself. As a nutritive stimulant, it is easily borne, delightfully agreeable to the taste and stomach. It may be employed in all of the chronic diseases characterized by serious blood and nerve lesions, as well as chronic bronchitis, typhoid fever, tuberculosis, and all other systemic or wasting diseases in which a stimulant is a prime requisite or factor.

....It has been found a palatable addition to the dietary of the convalescent....I particularly call attention to it as a medicine for women and children, with all the good qualities and benefits derived from best whiskey, containing no nauseating nostrums to derange the stomach, as such decoctions as cocktails, punches, eggnogs, etc., do, which are more harmful than beneficial, as has been every physician's experience."

(Signed) J. W. SMITH, M. D., St. Louis.

**If It Is a Drug Store** you desire to buy, advertise in the MEYER BROTHERS DRUGGIST.

# NEWS FROM HERE AND THERE.

Dr. W. E. Bradley is physician, surgeon and druggist at Ethel, Mo.

Joe Cording, formerly of Loup City, Neb., is now located at Litchfield, Neb.

Charles Brown is a dealer in drugs, patent medicines, druggists' sundries and cigars at Salem Center, Ind. He looks carefully after the interests of his customers.

Mr. Henry Swannell, of the firm of H. Swannell & Son, wholesale and retail druggists of Champaign, Ill., is enjoying an extended trip to California. He is ex-president of the I. Ph. A. and interested in general pharmaceutical affairs.

### The Maid and the Chemist.

A MAID, who'd ague-stricken been,
Was ordered, once, to take Quinine.
Then sped she to the CHEMIST'S straight,
And sought home, in the powdered State—
The cheapest Way—so she her Pelf
Might save, by mixing it herself.

Now, when she'd got it Home, our Lass
Dropped of the powder, in a Glass,
As much as would, if heaped up high,
Upon a silver sixpence lie,
Then poured a Gill of Water in
And stirred it with a knitting Pin.

But stir as hard as stir she could,
Her Efforts weren't the smallest Good;
Yea, though her knitting Pin she soon
Discarded for a Tablespoon,
And strove with *that* the Job to fix,
The stubborn Powder wouldn't mix.

Wearied, at last, and desp'rate grown,
She left the hopeless Task alone,
Back to the CHEMIST'S hot-foot ran,
And thus, in angry Tones, began:

"Shame on you, Man, to play such Tricks!
You've sold me Powder that won't mix."
"Not mix? Nay, Madam, may I ask,
How did you set about the Task?
What did you mix it with, fair MAID?"
"With Water, as the Doctor bade."
"With nothing else?"
"Naught else whate'er.

"Ah! Then your Failure's Cause is clear.
For don't you know, my simple Daughter,
*Quinine won't mix alone with Water?*
But *Something more* it needs must be
You add."
"What's that, good Sir?" cried she.
"It is," he smiled in Accents placid,
"Three Drops of STRONG SULPHURIC ACID!"

—[*Truth.*

## RISLEY-BIRD MFG. CO.

**94 Fifth Avenue :: NEW YORK**

Digitized by Google

**A Pink Envelope** means subscription due.

**Pearl Ovals** are packed in separate corrugated paper egg partitions, thus insuring them against breakage.

**The Best of All,** and, for over sixty years, an old and well-tried remedy. Mrs. Winslow's Soothing Syrup has been used for over sixty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhœa. Sold by druggists in every part of the world.

**If You Have Never Handled** Rudy's Pile Suppositories and desire to do so, it will pay you to write at once and send me the name of your jobbing house, and I will send to you in their care, *free of all charges*, two (2) boxes Rudy's Pile Suppositories, which retail at 50 cents each, with free samples, a neat metal sign, etc. They are now sold and recommended by over 5,000 druggists in this country, so you need not hesitate to place confidence in them. Manufactured by Martin Rudy (registered pharmacist), Lancaster, Pa.

**All Dealers** in medicine and proprietary goods can recommend Brown's Bronchial Troches with confidence. Fifty years of success prove these Troches to be the best remedy extant for coughs, hoarseness, bronchial and lung troubles. They are sold only in boxes. The title "Bronchial Troches" was established as a trade-mark by John I. Brown & Son, Boston, Mass., in 1856. Making or selling lozenges under the name of "Bronchial Troches" is a violation of this trade-mark, which has been sustained by the courts in numerous cases.

**The Alkaloids of Hydrastis Have Long Caused Confusion** due to the identity of some of them with alkaloids from other plants. J. Winchell Forbes, in *N. A. R. D. Notes*, gives the following lexicon which should be posted up in the prescription case:

**The Lexicon.**

Hydrastia and its salts (Merrell) means Berberin, etc.
Hydrastine and its salts (Merrell) means the white alkaloid hydrastin.
Hydrastin, eclectic resinoid.
Hydrastine (Lloyd), Berberin.
Hydrastine principles combined (Lloyd), eclectic resinoid.
Berberin (all other makers), the yellow alkaloid.
Hydrastine (all other makers), a white alkaloid.
Hydrastin*ine* (all other makers), a white alkaloid.

**Questions** for the Quiz Department of the MEYER BROTHERS DRUGGIST always welcome.

# NEWS FROM HERE AND THERE.

**Pestle Springs** is the way one compositor set up Pertle Springs where the Mo. Ph. A. meets annually. Bon Aqua is the appropriate name of the meeting place of the Tenn. Ph. A. and now some one proposes Saratoga Syrings for a meeting of the N. Y. Ph. A.

S. M. Tate, Jr., formerly at Staunton, Va., is now with the Allen Drug Co., at Chattanooga, Tenn.

Ramsay & Ludwig is a prosperous drug firm of Randalia, Ia., which anticipates even more trade during the new year.

Shoff & Hartman is a firm doing business under the name of the Rapid City Drug Co., at Rapid City, S. D. A prosperous business is the reward of the industry.

Bulletins of the "N. A. D. Notes" is a new feature of that spicy publication. The druggist who follows the direction of *N. A. R. D. Notes* and gives these weekly bulletins show window publicity will materially help the interests of the drug trade.

W. H. Skinner, president of the Arkansas Association of Pharmacists, now holds controlling interest in the Pocahontas City Bank. A reorganization at the annual meeting made Mr. Skinner president. Mr Skinner is one of the strong business men as well as able pharmacists of his state.

W. H. Carter is the popular representative of the American Soda Fountain Co. in the territory tributary to St. Louis. He was for years a representative of the wholesale drug trade and has an acquaintanceship which serves him well in his present line of satisfactory soda fountains.

W. H. CARTER.

The Cumulative Book Index, published by the Bobbs-Merrill Co., Indianapolis, Ind., completes Volume VIII., with the December issue. The convenience of this publication can only be fully appreciated by those who have the opportunity of making use of it.

### Kansas City College of Pharmacy Items.

F. C. Duigenan is at his old home again, Marysville, Kans.

Mr. Henry D. Faxon gave an interesting talk to the students, December 12.

**The A. Ph. A. Proceedings** constitute a volume well worth the price of the annual dues.

# NEWS FROM HERE AND THERE.

**A. Ph. A.,** Indianapolis, Ind., September 4, 1906.

**N. A. R. D.** meeting, place and date to be decided by the executive committee.

**The Chicago Veteran Druggists' Association** remembered its members with the following greeting:

One for All
All for One
Cheers for the Living
Happy New Year
1906 From All.

**Illinois Pharmacists** should carefully read every word of the official letter just issued to the trade and profession of that state by the board of pharmacy. It gives information without which a druggist cannot be considered well posted on points of vital importance in his calling.

J. M. A. Waugh is a chemist and druggist long established at Port Dalhousie, Ont.

W. E. Allen is proprietor of Allen's Pharmacy which does a retail drug business at Monroe, La.

H. Fred Curtis is proprietor of the Corner Drug Store which does a satisfactory business at Marietta, O.

F. W. Hancock is both secretary and treasurer of the N. C. Board of Pharmacy. He is located at Oxford.

John T. Sanders, Ph. G., is proprietor of the Enterprise Drug Store, at Forrest City, Ark. He graduated in St. Louis in 1895.

Dr. J. D. Trego, of Bellmont, Ill., is satisfied with his business during 1905, but proposes to increase it during the present year.

Mid-Summer Tours Through Europe.—That popular pharmacist, George W. Voss, of Cleveland, has made a wonderful success of his personally conducted summer tours through Europe. Parties interested should correspond with Mr. Voss.

W. E. Sanders, of Macoupin, Ill., proposes to keep up with the advances of pharmacy during 1906 by reading the current periodicals.

J. H. Hutchings, of Bancroft, Mich., keeps fully posted on all that pertains to his calling. He appreciates pharmaceutical journals.

"The Popular Science Monthly," published by the Science Press, Sub-Station 84, New York City, is a periodical which will interest all pharmacists. The subscription price is $3.00 per year.

The Pharmacopœia and Physicians.—Among those who are doing their part in bringing the Pharmacopœia to the attention of the medical profession is Professor E. G. Eberle, Dean of the Baylor University College of Pharmacy. The professor delivered a series of special lectures which were attended by the medical and pharmaceutical professions of Dallas. His work in the interest of pharmacy is well and favorably known.

---

**Medicine Bottles With Bells.**—A Mr. F. Webley, writing to the *Daily Mail*, says: "Seeing a paragraph in your paper relating how a child was accidentally poisoned through being given the contents of the wrong bottle, I think such accidents might easily be avoided if only drug stores would copy the admirable plan adopted by all chemists in Salisbury, Wilts, who fasten a small bell on the cork (attached by a thread under the sealing wax) on all bottles containing poison or liquid not intended for internal use."—[*British and Colonial Druggist.*

## To the Drug Trade:

THE SALES OF

# Armour's Extract of Beef

FOR THE PAST YEAR SHOW
A SUBSTANTIAL INCREASE

Did you get your share of this?

If not, your competitors are supplying trade that you might have had for the asking. While we know that you must supply what your trade demand, we believe you will give your customers better satisfaction, and have a larger profit by making a leader of ARMOUR'S EXTRACT OF BEEF, because it is THE BRAND THAT IS IN DEMAND. This year's advertising appropriation exceeds all past efforts. Our Beef Extract campaign includes

**145 City Daily Newspapers**
**22 Principal Magazines and Journals**
**94 Cities, Billposting**

The above in addition to our demonstrations, window exhibits, signs, hangers, showcards, etc.

Please look up your Beef Extract business for the past year, and if you haven't an increase in your sales of ARMOUR'S, won't you look into it at once? Your profit on ARMOUR'S EXTRACT OF BEEF will average as high as on other brands, and you don't have to make any apologies for it, or do any of the advertising yourself.

If you haven't shared in our increase, drop us a line, and we will try to devise ways and means to give you more business this year.

Yours very truly,

ARMOUR & COMPANY

The charge for above copies is twenty-five cents each.

J. E. Kautz has disposed of his business at Potter, Kans.

John F. Jordan has disposed of his drug interests at Fisk, Mo.

S. B. Wood, of Roan Mountain, Tenn., continues his prosperous drug business and also continues his interest in professional affairs.

Frank E. Lautz, formerly of Victor, Colo., has returned to his home town of Pekin, Ill.

Henry D. Mitchell spent his holiday vacation in the store of S. W. Mitchell, at Greenway, Ark.

C. C. Fulghum starts out right in the new year with an appreciation of pharmaceutical literature.

George W. Ebert, of Neoga, Ill., enters the new year with a resolution to give still further attention to pharmaceutical literature.

L. D. Balfour, of Carthage, Mo., is one of the prosperous retail druggists of the state. He is interested in all that pertains to pharmacy.

The Meyer Drug Co., Ltd., has an extensive retail drug business at Shreveport, La. They handle their own make of ice cream and soda and carry a line of cut flowers.

"The State Board Journal of America," published in Washington, D. C., and Atlanta, Ga., comes to hand in the new year with No. 3 of Volume I. It contains much matter of interest to pharmaceutical, medical and dental boards.

The Missouri Pharmacy, of Sedalia, Mo., Pickard & Patterson, proprietors, was closed December 11, by Trustee W. L. Wallace for the benefit of creditors. The assets, estimated at $5,000.00, will more than equal the liabilities.

Adolf Vogeler, formerly active in pharmaceutical journalism in this country, but now a resident of Santa Fe, Isle of Pines, has entered newspaper work as one of the editors of the Isle of Pines *Appeal*. This weekly newspaper gives evidence of the true United States spirit of progress.

Frederick W. Breaker, formerly a drug clerk in the United States, served three years in the medical department of the army in the Philippines, and for several months past has been engaged with a wholesale drug firm of Manila. He is much pleased with the opening for American enterprise in the pharmaceutical line.

Dr. E. T. Mitchell is spending some time in St. Louis, introducing to the medical profession Lac Bismo, which is manufactured by E. J. Hart & Co., Ltd., New Orleans. The doctor, in addition to being a genial gentleman, is particularly interested in microscopical work, having given careful attention to the study of plant histology and the identification of crystals by means of microzpolariscope.

DR. E. T. MITCHELL

To Discuss the Professional Side of Pharmacy is the object of meetings to be held in Cleveland, under the auspices of the Alumni Association of the Cleveland School of Pharmacy.

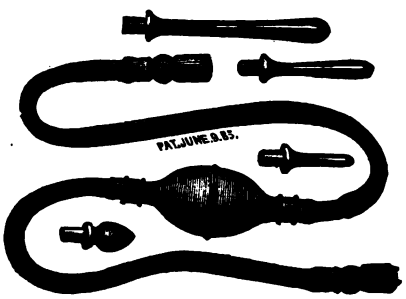
**Unsurpassed for Quality and as Low in Price as Other Brands**

## PHYSICIANS RECOMMEND THE "ALPHA" CONTINUOUS ...FLOW... SYRINGES



**Because they give NO INJECTION OF AIR.**

The ALPHA and the OMEGA Syringes positively prevent the painful and dangerous injection of air, so common with the old style of intermittent Syringes.

**ONLY IMPROVED AND RELIABLE SYRINGE OF THE AGE.**

**Brief claims for the Alpha "E" Syringe:**

Continuous flow, either gentle or strong. Positively no injection of air.
No fecal matter can be drawn back into the tubes. Pure Hard Rubber Pipes, the best non-conductor.
All Valves secured and cannot be lost. No Screw Threads on this syringe; therefore, it cannot leak.
Noiseless and non-corrosive Sinker. Easy to operate with thumb and finger.

The Druggist who wishes to largely increase his Soda Water Business should be sure to send in his order at once. The demand will increase rapidly. Cash rebate given to large purchasers.

**DELICIOUS! REFRESHING!**

# HANDLE STEARNS' SERUMS

On every sale of our Serums to the consumer you make 67 per cent profit on your investment.

Not only is your **percentage** of profit better, but you actually **make more money** on each sale, than on other serums.

Our serums are salable for at least 18 months.

This long term of salability, with the increased profit, far more than compensates for discontinuance of the exchange custom; and present indications are that this new plan of "lower price—no exchange" is making our serums by far the most popular of any.

We don't wish you to overstock—but **don't understock.**

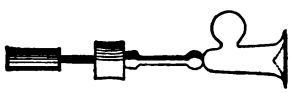
**IMPROVED HOOVER**



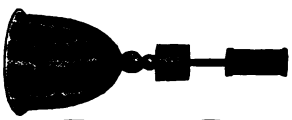
## Breast Pump

is the most perfect and satisfactory pump manufactured. Doctors and nurses appreciate this instrument above all other so-called instruments, for its advantages of running any degree of pressure that is called for to relieve the hardest drawing breast. Good profits for retail druggists.

**RETAIL PRICE, 75 CENTS EACH.**

MANUFACTURED AND GUARANTEED BY THE

**STANDARD MANUFACTURING CO. · · Waterloo, Iowa**



**THE IMPROVED HOOVER**

## Bust Developer

has proved very satisfactory to ladies who have used them, and follow the instructions, which is always very essential in order to receive the best results, as it is necessary to run a high pressure on the bust, forcing the blood through the tissues and receiving a natural circulation, which has failed and has caused the non-development. These instruments are far superior to any other developer that has ever been placed upon sale in drug stores. The instructions give a thorough explanation, and each and every lady may expect good results, if they treat as we said above, running a high pressure, which is the secret of the success.

MANUFACTURED BY THE

**STANDARD MANUFACTURING CO. · · Waterloo, Iowa**

## Foso Foam, Foso Bark AND Foso Soap

**World-Renowned Hair Producer and Restorer**

*"The Crowning Glory of Woman is her hair."*

Will grow hair upon a bald head, stop falling hair, allay itching, remove dandruff and all scalp diseases, without injury to the skin, and no matter at what age.

***Positively the Best Hair Dressing.***

*Physicians* and *analysts* pronounce it to be perfectly harmless and **devoid of any metallic or other injurious ingredients.** The Foso Hair remedy is a three-course treatment, consisting of one bottle of Foso Foam (an antiseptic medicated shampoo), one bottle of Foso Bark (a vegetable hair grower, non-metallic), and one bar Foso Soap (an antiseptic, cosmetic, emolient, deodorant, cleanser), the three constituting an outfit. **The Foso Hair Remedies are sold throughout the world,** and retail at $2.25 per outfit in the United States, Canada and Mexico. We will mail free trial sample upon receipt of 2-cent stamp to cover postage.

*Manufactured only by*

**The Altenheim Medical Dispensary,**

# ZOA-PHORA (Woman's Friend) $8.00

## PRICE NEVER HAS BEEN HIGHER

You, friend retailer, will be interested not only in the $8.00 price, but in the best advertising scheme ever adopted for making sales. We have it. We are now working it. If you are not receiving your share of the ZOA-PHORA business, it is simply because you have not notified us that you have ZOA-PHORA in stock. WE SEND OUR CUSTOMERS TO THE STORES THAT ARE PREPARED TO DELIVER THE GOODS.

This is what some of the druggists say who have tried our plan:

"Grand Rapids, Mich., Oct. 30, 1905.
ZOA-PHORA COMPANY, Kalamazoo, Mich.
Dear Sirs: Please ship us at once ten gross Zoa-Phora. Your recent advertising campaign in connection with the free $1.00 bottle is certainly a winner. We have sold Zoa-Phora for thirty years, but our sales during the past few months have been greater than ever before.—Yours truly, Hazeltine & Perkins Drug Co."

"We wish to state that we are greatly in favor of your plan of advertising, and would like to see a number of your certificates turned into our store.—Very respectfully, Sutter-Ludman Drug Co., Burlington, Iowa, Nov. 16, 1905."

"Enclosed find two of your free bottle certificates honored by me. Your remedy now meets with a ready sale in our store.—Ira Marsh, Checotah, Ind. Ter., Oct. 25, 1905."

"Enclosed find four certificates. The sales on Zoa-Phora are now commencing to duplicate. You surely will win out on this plan, and it helps my business.—Heyden's Pharmacy, 526 West Utica, Buffalo, N. Y., Oct. 8, 1905."

"Enclosed find seven free bottle certificates. Your samples are making sales, and we wish you success with your liberal plan of introducing your remedy.—Poage, Elliott & Poage Co., Ashland, Ky., Sept. 28, 1905."

"Please find enclosed three coupons which we have redeemed. We take this occasion to say that Zoa-Phora is selling well with us now, whereas, before we sold practically none. We thank you for your co-operation.—F. P. Weisenburger & Bro., Defiance, Ohio, Oct. 2, 1905."

"Please forward with next shipment of goods, through Meyer Brothers Drug Co., one dozen Zoa-Phora. We note a decided increase in sales since your new advertising campaign started.—McFarland & Elam, Henderson, Ky., Nov. 3, 1905."

"Enclosed find four Zoa-Phora certificates, for which please mail us check. We think your scheme a good one, as the sales of Zoa-Phora are steadily increasing.—Thompson-Robbins Drug Co., Pelham, Ga., Nov. 1, 1905."

"I enclose six coupons. Have sold over twelve dozen Zoa-Phora since you started the coupon deal.—Fairman's Drug Store, Big Rapids, Mich., Nov. 1, 1905."

"Please ship at once five gross Zoa-Phora.—Meyer Brothers Drug Co., St. Louis, Mo., Nov. 23, 1905."

(These jobbers never bought any larger quantity than twelve dozen at a time previous to the introduction of our new plan.)

¶ Our plan has met with Such unusual favor that less than one-third of one per cent of the retail druggists to whom the plan has been submitted have refused to co-operate.
¶ If you don't know our plan, but want us to make you customers, write for information.

For inflamed or bruised eyes, granulated eyelids, sore eyeballs and lids, small inflammatory humors called sties; in fact for any disease of, or injury to the eye, use

# Roman Eye Balsam

*Recommended and used in private practice by the most celebrated oculists in this and foreign countries.*

Sold in glass jars. Price 25 cents.

# Peery's DEAD SHOT VERMIFUGE

## For Worms

A highly valuable preparation, capable from the promptitude of its action of clearing the system in a few hours of every worm.

Its speedy operation in all sudden attacks, as convulsions, colic, fits, or spasms, gives it an unrivalled superiority.

Accept no substitute. Sold in vials.

**Price 25 Cents.**

# Dr. McMUNN'S Elixir of Opium

The pure and essential extract from the native drug. Possessing all the sedative, anodyne and antispasmodic powers of opium.

## Doctors Prescribe It

To produce sleep and composure.

To relieve pain and irritation, nervous excitement and morbid irritability of body and mind.

To allay convulsive and spasmodic actions, etc.

**Price 50 Cents.**

PREPARED ONLY BY

**Wright's Indian Vegetable Pill Co.**
**372 Pearl Street, New York.**

# WRIGHT'S Indian Vegetable PILLS

ALL "WRIGHT" FOR MORE THAN HALF A CENTURY

A strictly vegetable purgative excelling in efficacy any medicine ever before offered to the public. These singular pills are a combination of certain roots and herbs, the properties of one being a Sudorific, another a Diuretic, the third is an Expectorant, and the fourth a Cathartic, consequently by a single operation, the Lungs, Skin, Kidneys and Bowels, the natural drains, are opened and disease of every name is literally driven from the body.

AT YOUR DRUGGISTS.

PRICE, 25c. Per Box.

# Dr. CROSSMAN'S FOR GONORRHŒA SPECIFIC MIXTURE

PRICE $1.00

A SURE CURE, ABSOLUTELY HARMLESS. USED INTERNALLY. TWO BOTTLES SUFFICE IN ORDINARY CASES.

**BOX OF 12 CAPSULES, 50c; $1.00 PER BOX OF 24 CAPSULES.**

**426 STATE ST., CHICAGO.**

**ST. LOUIS COLLEGE OF PHARMACY,** 2108 and 2110 LOCUST ST.

**DAY LECTURES AND DAY WORK**

THIS COLLEGE was organized and is managed by an association of pharmacists to provide a thorough course of pharmaceutical instruction for the young men and women who desire to qualify themselves as pharmacists.

ALL THE TEACHERS ARE PRACTICAL PHARMACISTS, either having formerly been engaged in pharmaceutical work or still being engaged in such pursuits. They are therefore familiar with the requirements in modern pharmacies.

THE COLLEGE BUILDING is a substantial modern structure, well-lighted by a large light court in daytime and electricity at night, heated with steam, provided with three large lecture halls and three large and well-equipped laboratories, and all conveniences that can contribute to the comfort and educational advantages of the students.

THE ILLUSTRATIVE MATERIAL AND APPARATUS includes all modern pharmaceutical appliances, chemical apparatus and reagents, balances, microscopes, projection apparatus of various kinds, drug museum, etc., that can be utilized in illustrating and demonstrating the subjects taught, and new illustrative appliances are constantly being added. Probably no other college of pharmacy is as completely equipped in these respects as this one.

The fortieth annual session will close April 25, 1906. For matriculation requirements, address the Dean:

**DR. HENRY M. WHELPLEY, 222 South Broadway.**

For further information write to the Registrar:

**DR. OTTO AUGUSTUS WALL, JR., Grand Ave. and Hartford St., St. Louis, Mo.**
